

PROSPECTUS

Dated August 15, 2017

2,666,666 shares of Common Stock

Wrap Technologies, Inc. (the "*Company*") is offering up to 2,666,666 shares of common stock, par value of \$0.0001 ("*Common Stock*") ("*Shares*"), at a public offering price of \$1.50 per share. There is currently no public market for our Common Stock. In addition:

1. This is a "self-underwritten" public offering, with no minimum purchase requirement;
2. The Company is not using an underwriter for this offering;
and
3. There are currently no arrangements to place the proceeds from this offering in an escrow, trust or similar account.

The offering will commence on the effective date of this prospectus and will terminate on or before August 15, 2018. We will not extend the offering beyond the termination date. In our sole discretion, we may terminate the offering before all of Shares are sold.

We will sell the Shares ourselves, on a best efforts basis for a period of up to twelve months from the effective date of this prospectus. We do not plan to use underwriters or pay any commissions. There is no minimum number of Shares we must sell. As such, no funds raised from the sale of Shares will go into escrow, trust or another similar arrangement. Because there is no minimum to our offering, if we fail to raise sufficient capital to execute our business plan, investors could lose their entire investment and will not be entitled to a refund.

The Company is not a blank check company and does not have any intention to engage in a merger or other business combination.

A market maker has filed a Rule 211 application with FINRA so that our Common Stock may be quoted on an interdealer quotation system such as the OTC Markets. We currently intend to have our shares quoted on the OTCQB operated by the OTC Markets, although we may not be successful and our shares may never be quoted and owners of our Common Stock may not have a market in which to sell the shares. Also, no estimate may be given as to the time that this application process will require.

Due to the uncertainty of our ability to meet our current operating and capital expenses, our independent auditors have included a going concern opinion in their report on our audited financial statements for the period ending December 31, 2016. The notes to our financial statements contain additional disclosure describing the circumstances leading to the issuance of a going concern opinion by our auditors.

An investment in our securities involves a high degree of risk. We urge you to read carefully the "Risk Factors" section beginning on page 6 where we describe specific risks associated with an investment in Wrap Technologies, Inc. and our securities before you make your investment decision. You should purchase our securities only if you can afford a complete loss of your purchase.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved these securities, or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	Net Proceeds to Us if 25% of Shares Sold (666,666 Shares) (\$)	Net Proceeds to Us if 50% of Shares Sold (1,333,333 Shares) (\$)	Net Proceeds to Us if 75% of Shares Sold (2,000,000 Shares) (\$)	Net Proceeds to Us if 100% of Shares Sold (2,666,666 Shares) (\$)
Public Offering Price per Share	\$ 1.50	\$ 1.50	\$ 1.50	\$ 1.50
Offering Expenses (1)(2)	\$ 50,000	\$ 50,000	\$ 50,000	\$ 50,000
Net Proceeds (3)	\$ 950,000	\$ 1,950,000	\$ 2,950,000	\$ 3,950,000

(1) The total amount of offering expenses is estimated to be \$50,000. See “*Use of Proceeds*” for additional information.

(2) There are no underwriting discounts or commissions being paid in connection with this offering. Our officers and directors will not receive any compensation for their role in offering or selling the Shares in this offering.

(3) Net Proceeds includes the deduction of offering expenses estimated to be \$50,000.

We are an “emerging growth company” under the Federal securities laws and will therefore be subject to reduced public company reporting requirements. Investment in the Shares offered by this prospectus involves a high degree of risk. You may lose your entire investment.

The date of this Prospectus is August 15, 2017

ABOUT THIS PROSPECTUS

You should rely only on the information contained in or incorporated by reference into this prospectus and any prospectus supplement or free writing prospectus authorized by us. To the extent the information contained in this prospectus differs or varies from the information contained in any document filed prior to the date of this prospectus and incorporated by reference, the information in this prospectus will control. We have not authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. The information in this prospectus is accurate only as of the date it is presented. You should read this prospectus, and any prospectus supplement or free writing prospectus that we have authorized for use in connection with this offering, in their entirety before investing in our securities.

We are offering to sell, and seeking offers to buy, the securities offered by this prospectus only in jurisdictions where offers and sales are permitted. The distribution of this prospectus and the offering of the securities offered by this prospectus in certain jurisdictions may be restricted by law. This prospectus does not constitute, and may not be used in connection with, an offer to sell, or a solicitation of an offer to buy, any securities offered by this prospectus in any jurisdiction in which it is unlawful for such person to make such an offer or solicitation.

Unless the context otherwise requires, the words "*Wrap Technologies, Inc.*," "*Wrap Technologies*," "*Wrap Tech*," "*we*," "*the Company*," "*us*" and "*our*" refer to Wrap Technologies, Inc., a Delaware corporation.

Unless indicated otherwise, the information included in this prospectus assumes that (i) the shares of common stock to be sold in this offering are sold at \$1.50 per share, as set forth on the cover page of this prospectus, and (ii) all shares offered by us in this offering are sold.

PROSPECTUS SUMMARY

The following is a summary of the material terms of the offering described in this prospectus. This summary is qualified in its entirety by the more detailed information set forth elsewhere in this prospectus, including our financial statements and notes thereto. We urge you to read carefully the entire prospectus, especially the risks discussed under "Risk Factors" and our financial statements.

Our Company

We are a development stage security technology company focused on delivering innovative solutions to customers, primarily law enforcement and security personnel. We plan to introduce our first product, the BolaWrap™ 100, during 2017.

The BolaWrap™ 100 is a hand-held remote restraint device that discharges an eight-foot bola style Kevlar® tether to entangle an individual at a range of 10-25 feet. Inspired by law enforcement professionals, the small but powerful BolaWrap™ 100 assists law enforcement to safely and effectively control encounters. Law enforcement agencies authorize a continuum of force options:

- verbal commands;
- physical control – soft techniques of grabs and holds progressing to hard techniques such as punches and kicks;
- less-lethal weapons - batons, pepper spray, impact munitions and CEWs (conducted electrical weapons);
and
- lethal force – deadly weapons such as firearms.

BolaWrap™ 100 offers law enforcement a new tool to remotely and temporarily control an individual or impede flight by targeting and wrapping an individual's legs.

The small, light but rugged BolaWrap™ 100 is designed for weak hand operation to provide remote restraint while other use of force continuum options remain open. The design offers wide latitude of accuracy to engage and restrain targeted legs of a subject. Quick eject and rapid reload of bola cartridges allows one device to be reused in a single encounter or in multiple encounters.

There are limited effective options for remote engagement so when verbal commands go unheeded law enforcement is faced with either hands on engagement or other potentially injurious less lethal or lethal force. We believe our new tool is essential to meet modern policing requirements with individuals frequently not responding to verbal commands and to assuage public demands for less lethal policing. We believe our device minimizes the need to employ other uses of force including combat and less-lethal weapons. Many less-lethal weapons rely on "pain compliance" often escalating encounters with potential for injury.

We intend to commercialize the BolaWrap™ 100 by initially targeting sales to the approximate 18,000 United States law enforcement agencies with approximately 765,000 full time officers and to the United States Border Patrol with 21,000 border patrol agents. Thereafter we intend to target law enforcement agencies and security personnel worldwide.

Although we are working towards commercialization of BolaWrap™ 100, we have not yet established supplier or production arrangements. We have not generated any revenues to date, have no customers and currently have no products available for sale. Sale of our planned products may require additional governmental licenses or approvals that we have not yet obtained. Our independent registered public accounting firm stated in their audit opinion issued in connection with our balance sheet and other financial statements as of December 31, 2016 that our net losses and our requirement to secure additional financing raised substantial doubt about our ability to continue as a going concern. We had an accumulated deficit as of March 31, 2017 of \$436,111. See "Risk Factors" included in this prospectus for additional information regarding risks and uncertainties associated with our business.

Our Strengths and Challenges

We believe the following competitive strengths position us for future operating success, growth and ultimately, profitability:

- We are pioneering the BolaWrap™ 100 device. There has been no restraint or less-lethal product broadly accepted by law enforcement since the 1994 introduction of the Taser CEW (conducted electrical weapon also referred to as CED, or conducted energy device);
- We believe we are creating important intellectual property around our product;
- Our initial focus on BolaWrap™ 100 affords us great sales and marketing flexibility to respond to and meet customer requirements; and
- Our management team has developed a strong technical base in this technology and is experienced in innovating and bringing products to market. We plan to develop a line of BolaWrap™ entanglement products and develop additional security technology products.

We expect to face significant challenges and uncertainties in executing our business plan, including but not limited to the following:

- We need to rapidly, profitably and successfully commercialize the BolaWrap™ 100 product and develop additional versions of the technology, and develop new technologies and products;
- Our products must meet the needs of customers and we need to generate sufficient revenues to sustain profitable operations;
- We have limited personnel and financial resources to develop required business functions, including development, production, marketing, sales, distribution, service and administration;
- We will be required to obtain additional financing until we are able to produce sufficient revenues and profitability to sustain future operations; and
- We face the uncertainties and risks facing any development stage company, including but not limited to, the risk factors described in the section entitled “*Risk Factors*” starting on page 6.

Our Strategy

Our goal is to realize the potential of a new remote restraint device targeting law enforcement and security personnel. We aim to produce a product line starting with the BolaWrap™ 100 to meet the requirements of these customers. The key elements of our strategy include:

- Produce a product line meeting customer requirements as a new tool to aid in the retention of individuals to make encounters more effective and less dangerous to law enforcement and the public;
- Develop a robust production and supply system to support our customers; and
- Develop relationships with customers requiring large numbers of products, mainly larger city police departments and large agencies.

We also plan to explore markets for use by security and related personnel and develop international distribution.

Risk Factors

Our business is subject to substantial risk. Please carefully consider the “*Risk Factors*” beginning on page 6 of this prospectus for a discussion of the factors you should carefully consider before deciding to purchase the securities offered by this prospectus. These risks include, among others:

- we are a development stage technology company with no current revenues or approved products, and limited experience developing security technology for law enforcement or other security personnel, which makes it difficult to assess our future viability;
- we depend heavily on the success of BolaWrap™ 100, and we cannot be certain that we will be able to obtain regulatory approval for, or successfully commercialize, BolaWrap™ 100, or any future products;
- we face significant competition, and if we are unable to compete effectively, we may not be able to achieve or maintain significant market penetration or improve our results of operations;
- if we are unable to adequately protect our proprietary technology, or obtain and maintain issued patents that are sufficient to protect our product candidates, others could compete against us more directly, which would have a material adverse impact on our business, results of operations, financial condition and prospects;
- we have incurred significant net losses since inception and we will continue to incur substantial operating losses for the foreseeable future;
and
- following the completion of the transactions described in this prospectus, our directors will own an aggregate of approximately 62.5% of our outstanding voting securities, assuming we sell 2,666,666 Shares, and will have the potential ability to exert influence on the outcome of issues requiring approval by the Company’s shareholders.

Corporate Information

Our principal executive offices are located at 4620 Arville Street, Suite E, Las Vegas, Nevada 89103, and our telephone number is (800) 583-2652. Our website addresses are www.wrapttechnologies.com and www.bolawrap.com. Information contained on, or that can be accessed through, our websites, is not incorporated by reference into this prospectus, and you should not consider information on our website to be part of this prospectus.

The Offering

Securities we are offering	2,666,666 shares of Common Stock
Common Stock outstanding after this offering	23,141,666 shares of Common Stock.
Use of proceeds	We estimate that the maximum net proceeds to us from this offering, after deducting the estimated offering expenses payable by us, and based on the public offering price of \$1.50 per Share, which is set forth on the cover page of this prospectus, will be approximately \$3.95 million. We intend to use the net proceeds of this offering principally for research, development and tooling, and sales and marketing. See " <i>Use of Proceeds</i> " for a more complete description of the intended use of proceeds from this offering.

RISK FACTORS

In addition to the information contained elsewhere in this prospectus, you should consider carefully the following risk factors related to Wrap Tech. If any of the risks described below actually occur, our business, financial condition, results of operations, cash flows and stock price could be materially adversely affected. This prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the risks faced by us described below and elsewhere in this prospectus. See "Special Note About Forward-Looking Statements" on page 14.

Risk Factors Relating to Our Business

We have a history of operating losses, expect additional losses and may not achieve or sustain profitability.

We have a history of operating losses and expect additional losses as we introduce our new product line and until we achieve revenues and resulting margins to offset our operating costs. Our net loss for the period from inception (March 2, 2016) to December 31, 2016 was \$234,356 and for the three months ended March 31, 2017 was \$201,755. Our ability to achieve future profitability is dependent on a variety of factors, many outside our control. Failure to achieve profitability or sustain profitability, if achieved, may require us to continue to raise additional financing which could have a material negative impact on the market value of our Common Stock.

Our independent auditors have expressed substantial doubt about our ability to continue as a going concern.

In their audit opinion issued in connection with our balance sheet as of December 31, 2016 and our related statements of operations, changes in owners equity and cash flows for the period then ended, our independent registered public accounting firm stated that our net losses and our requirement to secure additional financing raised substantial doubt about our ability to continue as a going concern. We have prepared our financial statements on a going concern basis which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business for the foreseeable future. Our financial statements do not include any adjustments that would be necessary should we be unable to continue as a going concern and, therefore, be required to liquidate our assets and discharge our liabilities in other than the normal course of business, and at amounts different from those reflected in our financial statements. If we are unable to continue as a going concern, our shareholders may lose a substantial portion or all of their investment.

We need additional capital to execute our business plan, and raising additional capital, if possible, by issuing additional equity securities may cause dilution to existing shareholders. In addition, raising additional capital by issuing additional debt financing may restrict our operations.

While we may be able to generate some funds from product sales, existing working capital will not be sufficient due to product introduction costs, operating losses and other factors. Principal factors affecting the availability of internally generated funds include:

- failure of product sales to meet planned projections;
- working capital requirements to support business growth;
- our ability to control spending; and
- acceptance of our product in planned markets.

In the event we are required to raise additional capital through the issuance of equity or convertible debt securities, the percentage ownership of our shareholders could be diluted significantly, and these newly issued securities may have rights, preferences or privileges senior to those of our existing shareholders. In addition, the issuance of any equity securities could be at a discount to the market price.

If we incur debt financing, the payment of principal and interest on such indebtedness may limit funds available for our business activities, and we could be subject to covenants that restrict our ability to operate our business. These restrictive covenants may include limitations on additional borrowing and specific restrictions on the use of our assets, as well as prohibitions on our ability to create liens, pay dividends, redeem stock or make investments. There is no assurance that any equity or debt financing transaction will be available on acceptable terms, or at all.

We are a development stage technology company with no current revenues or approved products, and limited experience developing security technology for law enforcement or other security personnel, as well as other areas required for the successful development and commercialization of BolaWrap™ 100, our first product, which makes it difficult to assess our future viability.

We are a development stage technology company. Although our we are currently in the process of commercializing our first product, BolaWrap™ 100, we currently have no approved products and currently generate no revenues, and we have not yet fully demonstrated an ability to overcome many of the fundamental risks and uncertainties frequently encountered by development stage companies in new and rapidly evolving fields of technology. To execute our business plan successfully, we will need to accomplish the following fundamental objectives, either on our own or with strategic collaborators:

- successfully commercialize BolaWrap™ 100, and develop future products for commercialization;
- develop and obtain required regulatory approvals for commercialization of products we produce;
- establish an intellectual property portfolio for BolaWrap™ 100 and other future products;
- establish and maintain sales, distribution and marketing capabilities, and/or enter into strategic partnering arrangements to access such capabilities;
- gain market acceptance for BolaWrap™ 100 and/or other future products;
- and
- obtain adequate capital resources and manage our spending as costs and expenses increase due to research, production, development, regulatory approval and commercialization of BolaWrap™ 100 and/or other future products.

Our principal product remains under development, and has not yet been produced in any commercial quantities. We may incur significant and unpredictable warranty costs as our products are introduced and produced.

Our principal product remains under development, and has not been formally introduced into the marketplace. No assurance can be provided that we can successfully produce commercial quantities of our principal product. We generally expect to warrant our products to be free from defects in materials and workmanship for a period of up to one year from the date of purchase. We may incur substantial and unpredictable warranty costs from post-production product or component failures. Future warranty costs could further adversely affect our financial position, results of operations and business prospects.

We are materially dependent on the acceptance of our product by the law enforcement market. If law enforcement agencies do not purchase our product, our revenues will be adversely affected and we may not be able to expand into other markets, or otherwise continue as a going concern.

A substantial number of law enforcement agencies may not purchase our remote restraint product. In addition, if our product is not widely accepted by the law enforcement market, we may not be able to expand sales of our product into other markets. Law enforcement agencies may be influenced by claims or perceptions that our product is not effective or may be used in an abusive manner. Sales of our product to these agencies may be delayed or limited by such claims or perceptions.

We will be dependent on sales of the BolaWrap™ 100 product, and if this product is not widely accepted, our growth prospects will be diminished.

We expect to depend on sales of the BolaWrap™ 100 and related cartridges for the foreseeable future. A lack of demand for this product, or its failure to achieve broad market acceptance, would significantly harm our growth prospects, operating results and financial condition.

If we are unable to manage our projected growth, our growth prospects may be limited and our future profitability may be adversely affected.

We intend to expand our sales and marketing programs and our manufacturing capability. Rapid expansion may strain our managerial, financial and other resources. If we are unable to manage our growth, our business, operating results and financial condition could be adversely affected. Our systems, procedures, controls and management resources also may not be adequate to support our future operations. We will need to continually improve our operational, financial and other internal systems to manage our growth effectively, and any failure to do so may lead to inefficiencies and redundancies, and result in reduced growth prospects and profitability.

We may face personal injury and other liability claims that harm our reputation and adversely affect our sales and financial condition.

Our product is intended to be used in confrontations that could result in injury to those involved, whether or not involving our product. Our product may cause or be associated with such injuries. A person injured in a confrontation or otherwise in connection with the use of our product may bring legal action against us to recover damages on the basis of theories including personal injury, wrongful death, negligent design, dangerous product or inadequate warning. We may also be subject to lawsuits involving allegations of misuse of our product. If successful, personal injury, misuse and other claims could have a material adverse effect on our operating results and financial condition. Although we carry product liability insurance, significant litigation could also result in a diversion of management's attention and resources, negative publicity and an award of monetary damages in excess of our insurance coverage.

Our future success is dependent on our ability to expand sales through direct sales or distributors, and our inability to grow our sales force or recruit new distributors would negatively affect our sales.

Our distribution strategy is to pursue sales through multiple channels with an emphasis on direct sales and, in the future, independent distributors. Our inability to recruit and retain sales personnel and police equipment distributors who can successfully sell our products could adversely affect our sales. If we do not competitively price our products, meet the requirements of any future distributors or end-users, provide adequate marketing support, or comply with the terms of any distribution arrangements, such distributors may fail to aggressively market our product or may terminate their relationships with us. These developments would likely have a material adverse effect on our sales. Should we employ distributors our reliance on the sales of our products by others also makes it more difficult to predict our revenues, cash flow and operating results.

We expect to expend significant resources to generate sales due to our lengthy sales cycle, and such efforts may not result in sales or revenue.

Generally, law enforcement agencies consider a wide range of issues before committing to purchase a product, including product benefits, training costs, the cost to use our product in addition to, or in place of other use of force products, product reliability and budget constraints. The length of our sales cycle may range from 30 days to a year or more. We may incur substantial selling costs and expend significant effort in connection with the evaluation of our product by potential customers before they place an order. If these potential customers do not purchase our product, we will have expended significant resources without corresponding revenue.

Most of our intended end-users are subject to budgetary and political constraints that may delay or prevent sales.

Most of our intended end-user customers are government agencies. These agencies often do not set their own budgets and therefore have little control over the amount of money they can spend. In addition, these agencies experience political pressure that may dictate the manner in which they spend money. As a result, even if an agency wants to acquire our product, it may be unable to purchase due to budgetary or political constraints. Some government agency orders may also be canceled or substantially delayed due to budgetary, political or other scheduling delays which frequently occur in connection with the acquisition of products by such agencies.

Government regulation of our products may adversely affect sales.

Our device is classified as a firearm regulated by the Bureau of Alcohol, Tobacco and Firearms involving substantial regulatory compliance. Our device may also face state restrictions especially regarding sales to security agencies. Our product sales may be significantly affected by federal, state and local regulation. Failure to comply with regulations could also result in the imposition of fines, penalties and other actions that could adversely impact our financial position, cash flows and operating results.

Our product may also be controlled by the United States Department of Commerce ("DOC"), for export directly from the United States. Consequently, we may need to obtain an export license from the DOC for the export of our product from the United States other than to Canada. Compliance with or changes in U.S. export regulations could significantly and adversely affect any future international sales.

Certain foreign jurisdictions may restrict the sale of our device limiting our international sales opportunities.

Our products, including BolaWrap™ 100, have no issued patents or other intellectual property protection. If we are unable to protect our intellectual property, we may lose a competitive advantage or incur substantial litigation costs to protect our rights.

Our future success depends in part upon our proprietary technology. None of our products, including BolaWrap™ 100, have any issued patented or other intellectual property protection. Our protective measures taken thus far, including pending patents, trademarks and trade secret laws, may prove inadequate to protect our proprietary rights. There can be no assurance we will be granted any patent rights from pending patents. The scope of any possible patent rights may not prevent others from developing and selling competing products. The validity and breadth of claims covered in any possible patents involve complex legal and factual questions, and the resolution of such claims may be highly uncertain, lengthy, and expensive. In addition, any patents, if granted, may be held invalid upon challenge, or others may claim rights in or ownership of our patents.

Our competitive position will be seriously damaged if our products are found to infringe on the intellectual property rights of others.

Other companies and our competitors may currently own or obtain patents or other proprietary rights that might prevent, limit or interfere with our ability to make, use or sell our products. Any intellectual property infringement claims against us, with or without merit, could be costly and time-consuming to defend and divert our management's attention from our business. In the event of a successful claim of infringement against us and our failure or inability to license the infringed technology, our business and operating results could be adversely affected. Any litigation or claims, whether or not valid, could result in substantial costs and diversion of our resources. An adverse result from intellectual property litigation could force us to do one or more of the following:

- cease selling, incorporating or using products or services that incorporate the challenged intellectual property;
- obtain a license from the holder of the infringed intellectual property right, which license may not be available on reasonable terms, if at all; and
- redesign products or services that incorporate the disputed technology.

If we are forced to take any of the foregoing actions, we could face substantial costs and shipment delays and our business could be seriously harmed. Although we carry general liability insurance, our insurance may not cover potential claims of this type or be adequate to indemnify us for all liability that may be imposed.

In addition, it is possible that our customers may seek indemnity from us in the event that our products are found or alleged to infringe the intellectual property rights of others. Any such claim for indemnity could result in substantial expenses to us that could harm our operating results.

We have no experience developing law enforcement products. Our lack of experience and competition in the law enforcement market could reduce our sales and prevent us from achieving profitability.

The law enforcement market is highly competitive and our management team has no experience developing law enforcement products. We face competition from numerous larger, better capitalized, more experienced and more widely known companies that make restraint devices, less-lethal weapons and other law enforcement products. Increased competition could result in greater pricing pressure, lower gross margins and reduced sales, and prevent us from achieving profitability.

We cannot predict our future operating results. Our quarterly and annual results will likely be subject to fluctuations caused by many factors, any of which could result in our failure to achieve our expectations.

We currently expect our BolaWrap™ 100 product will be the source of all of any future revenues. Revenues, if any, are expected to vary significantly due to a number of factors. Many of these factors are beyond our control. Any one or more of these factors, including those listed below, could cause us to fail to achieve our revenue expectations. These factors include:

- our ability to develop and supply product to customers;
- market acceptance of, and changes in demand for, our products;
- gains or losses of significant customers, distributors or strategic relationships;
- unpredictable volume and timing of customer orders;
- the availability, pricing and timeliness of delivery of components for our products;
- fluctuations in the availability of manufacturing capacity or manufacturing yields and related manufacturing costs;
- timing of new technological advances, product announcements or introductions by us and by our competitors;
- unpredictable warranty costs associated with our product;
- budgetary cycles and order delays by customers or production delays by us or our suppliers;
- regulatory changes affecting the marketability of our products;
- general economic conditions that could affect the timing of customer orders and capital spending and result in order cancellations or rescheduling; and
- general political conditions in this country and in various other parts of the world that could affect spending for the products that we intend to offer.

Some or all of these factors could adversely affect demand for our products and, therefore, adversely affect our future operating results. As a result of these and other factors, we believe that period-to-period comparisons of our operating results may not be meaningful in the near term and accordingly you should not rely upon our performance in a particular period as indicative of our performance in any future period.

Our expenses may vary from period to period, which could affect quarterly results and our stock price.

If we incur additional expenses in a quarter in which we do not experience increased revenue, our results of operations will be adversely affected and we may incur larger losses than anticipated for that quarter. Factors that could cause our expenses to fluctuate from period to period include:

- the timing and extent of our research and development efforts;
- investments and costs of maintaining or protecting our intellectual property;
- the extent of marketing and sales efforts to promote our products and technologies; and
- the timing of personnel and consultant hiring.

Our dependence on third-party suppliers for key components of our product could delay shipment of our products and reduce our sales.

We will depend on certain domestic and foreign suppliers for the delivery of components used in the assembly of our product. Our reliance on third-party suppliers creates risks related to our potential inability to obtain an adequate supply of components or subassemblies and reduced control over pricing and timing of delivery of components and subassemblies. Specifically, we will depend on suppliers of sub-assemblies, machined parts, injection molded plastic parts, and other miscellaneous custom parts for our product. We do not have any long-term supply agreements with any planned suppliers. Any interruption of supply for any material components of our products could significantly delay the shipment of our products and have a material adverse effect on our revenues, profitability and financial condition.

Foreign currency fluctuations may reduce our competitiveness and sales in foreign markets.

The relative change in currency values creates fluctuations in product pricing for future potential international customers. These changes in foreign end-user costs may result in lost orders and reduce the competitiveness of our products in certain foreign markets. These changes may also negatively affect the financial condition of some foreign customers and reduce or eliminate their future orders of our products.

Loss of key management and other personnel could impact our business.

Our business is substantially dependent on our officers and other key personnel. The loss of an officer or any key personnel could materially adversely affect our business, financial condition, results of operations and cash flows. In addition, competition for skilled and non-skilled employees among companies like ours is intense, and the future loss of skilled or non-skilled employees or an inability to attract, retain and motivate additional skilled and non-skilled employees required for the operation and expansion of our business could hinder our ability to conduct research activities successfully, develop new products, attract customers and meet customer shipments.

Inadequate internal controls and accounting practices could lead to errors, which could negatively impact our business, financial condition, results of operations and cash flows.

We will need to establish internal controls and management oversight systems. Our small size and limited personnel and consulting resources will make doing so more challenging than for more established entities. We may not be able to prevent or detect misstatements in our reported financial statements due to system errors, the potential for human error, unauthorized actions of employees or contractors, inadequacy of controls, temporary lapses in controls due to shortfalls in transition planning and oversight resource contracts and other factors. In addition, due to their inherent limitations, such controls may not prevent or detect misstatements in our reported financial results as required under SEC rules, which could increase our operating costs or impair our ability to operate our business. Controls may also become inadequate due to changes in circumstances. It will be necessary to replace, upgrade or modify our internal information systems from time to time. If we are unable to implement these changes in a timely and cost-effective manner, our ability to capture and process financial transactions and support our customers as required may be materially adversely impacted, which could harm our business, financial condition, results of operations and cash flows.

Risk Factors Relating to Our Common Stock

Currently, there is no established public market for our Common Stock, and there can be no assurances that any established public market will ever develop or that our Common Stock will be quoted for trading, and even if quoted, it is likely to be subject to significant price fluctuations.

Prior to the date of this prospectus, there has not been any established trading market for our Common Stock, and there is currently no established public market for our securities. A market maker has filed an application with FINRA on our behalf so as to be able to quote the price of our Common Stock on the OTC Markets commencing upon the effectiveness of our registration statement of which this prospectus is a part. There can be no assurance that the market maker's application will be accepted by FINRA nor can we estimate as to the time period that the application will require. We are not permitted to file such application on our own behalf. If the application is accepted, there can be no assurances as to whether:

- any market for our Shares will develop;
- the prices at which our Common Stock will trade;
- or
- the extent to which investor interest in us will lead to the development of an active, liquid trading market. Active trading markets generally result in lower price volatility and more efficient execution of buy and sell orders for investors.

In addition, our Common Stock is unlikely to be followed by any market analysts, and there may be few institutions acting as market makers for our Common Stock. Either of these factors could adversely affect the liquidity and trading price of our Common Stock. Until an orderly market develops in our Common Stock, if ever, the price at which it trades is likely to fluctuate significantly. Prices for our Common Stock will be determined in the marketplace and may be influenced by many factors, including the depth and liquidity of the market for shares of our Common Stock, developments affecting our business, including the impact of the factors referred to elsewhere in these Risk Factors, investor perception of BoloWrap™ 100 and general economic and market conditions. No assurances can be given that an orderly or liquid market will ever develop for the shares of our Common Stock.

Our Common Stock will be subject to "penny stock" rules.

We expect that our Common Stock will be defined as a "penny stock" under Rule 3a51-1 promulgated under the Exchange Act. "Penny stocks" are subject to Rules 15g-2 through 15g-7 and Rule 15g-9, which impose additional sales practice requirements on broker-dealers that sell penny stocks to persons other than established customers and institutional accredited investors. Among other things, for transactions covered by these rules, a broker-dealer must make a special suitability determination for the purchaser and have received the purchaser's written consent to the transaction prior to sale. Consequently, these rules may affect the ability of broker-dealers to sell our Common Stock and affect the ability of holders to sell their shares of our Common Stock in the secondary market. To the extent our Common Stock is subject to the penny stock regulations, the market liquidity for our shares will be adversely affected.

You will incur immediate and substantial dilution of the price you pay for your Shares, which could affect the overall monetary value of your shares. If the value of your Shares significantly decreases, you could lose your investment.

Any investment you make in the Shares may result in the immediate and substantial dilution of the net tangible book value of those Shares from the price you pay for them, based upon the net tangible book value of the Shares as it relates to the offering price.

We cannot predict the price range or volatility of our Common Stock, and sales of a substantial number of shares of our Common Stock may adversely affect the market price of our Common Stock.

From time to time, the market price and volume of shares traded of companies in the industry in which we operate experience periods of significant volatility. Company-specific issues and developments generally affecting our industries or the economy may cause this volatility. The market price of our Common Stock may fluctuate in response to a number of events and factors, including:

- general economic, market and political conditions;
- quarterly variations in results of operations or results of operations that are below public market analyst and investor expectations;
- changes in financial estimates and recommendations by securities analysts;
- operating and market price performance of other companies that investors may deem comparable;
- press releases or publicity relating to us or our competitors or relating to trends in our markets; and
- sales of Common Stock or other securities by insiders.

In addition, broad market and industry fluctuations, investor perception and the depth and liquidity of the market for our Common Stock may adversely affect the trading price of our Common Stock, regardless of actual operating performance.

Sales of a substantial number of shares of our Common Stock in the public market, or the perception that such sales could occur, could adversely affect the market price of our Common Stock. Many of the shares of our Common Stock, other than the shares held by executive officers and directors, will be eligible for immediate resale in the public market following the effectiveness of the registration statement, of which this prospectus is a part. Investment criteria of certain investment funds and other holders of our Common Stock may result in the immediate sale of our Common Stock after such effectiveness to the extent such stock no longer meets these criteria. Substantial selling of our Common Stock, whether as a result of the effectiveness of the registration statement or otherwise, could adversely affect the market price of our Common Stock.

We cannot assure you as to the price at which our Common Stock will trade as a result of the offering. Until our Common Stock is fully distributed and an orderly market develops in our Common Stock, the price at which our Common Stock trades may fluctuate significantly and may be lower or higher than the price that would be expected for a fully distributed issue.

Our directors are among our largest shareholders, and may have certain personal interests that may affect the Company.

Following the completion of the transactions described in this prospectus, assuming we sell 2,666,666 Shares, our directors, James A. Barnes, Elwood G. Norris and Scot Cohen will own 11.4%, 26.9% and 24.2% of the Company's outstanding voting securities, respectively, or an aggregate of approximately 62.5%. As a result, our directors, acting individually or as a group, have the potential ability to exert influence on the outcome of issues requiring approval by the Company's shareholders. This concentration of ownership may have effects such as delaying or preventing a change in control of the Company that may be favored by other shareholders or preventing transactions in which shareholders might otherwise recover a premium for their shares over current market prices.

We may issue additional Common Stock in the future. The issuance of additional Common Stock may reduce the value of your Common Stock.

We may issue additional shares of Common Stock without further action by our shareholders. Moreover, the economic and voting interests of each stockholder will be diluted as a result of such issuances. Although the number of shares of Common Stock that shareholders presently own will not decrease, such shares will represent a smaller percentage of the total shares that will be outstanding after the issuance of additional shares. The issuance of additional shares of Common Stock may cause the market price of our Common Stock to decline.

Sales of Common Stock issuable on the exercise of any future options or warrants may lower the price of our Common Stock.

We adopted a stock option plan on March 31, 2017, which will authorize the grant of options or restricted stock awards to purchase up to 2.0 million shares of our Common Stock to our employees, directors and consultants. The issuance of shares of Common Stock issuable upon the exercise or conversion of options could cause substantial dilution to existing holders of Common Stock, and the sale of those shares in the market could cause the market price of our Common Stock to decline. The potential dilution from the issuance of these shares could negatively affect the terms on which we are able to obtain equity financing.

We may issue preferred stock in the future, and the terms of the preferred stock may reduce the value of your Common Stock.

We are authorized to issue up to 5,000,000 shares of preferred stock in one or more series. Our Board of Directors may determine the terms of future preferred stock offerings without further action by our shareholders. If we issue preferred stock, it could affect your rights or reduce the value of your Common Stock. In particular, specific rights granted to future holders of preferred stock could be used to restrict our ability to merge with or sell our assets to a third party. Preferred stock terms may include voting rights, preferences as to dividends and liquidation, conversion and redemption rights and sinking fund provisions.

The payment of dividends will be at the discretion of our Board of Directors.

The declaration and amount of future dividends, if any, will be determined by our Board of Directors and will depend on our financial condition, earnings, capital requirements, financial covenants, regulatory constraints, industry practice and other factors our Board deems relevant. See “*Dividend Policy*” on page 17 for additional information on our dividend policy.

JUMPSTART OUR BUSINESS STARTUPS ACT

We qualify as an “emerging growth company” as defined in Section 101 of the Jumpstart our Business Startups Act (“*JOBS Act*”) as we do not have more than \$1.0 billion in annual gross revenue and did not have such amount as of December 31, 2016, our last fiscal year. We are electing to use the extended transition period for complying with new or revised accounting standards under Section 102(b)(1) of the JOBS Act.

We may lose our status as an emerging growth company on the last day of our fiscal year during which (i) our annual gross revenue exceeds \$1.0 billion or (ii) we issue more than \$1.0 billion in non-convertible debt in a three-year period. We will lose our status as an emerging growth company (i) if at any time we are deemed to be a large accelerated filer. We will lose our status as an emerging growth company on the last day of our fiscal year following the fifth anniversary of the date of the first sale of common equity securities pursuant to an effective registration statement.

As an emerging growth company we are exempt from Section 404(b) of the Sarbanes-Oxley Act of 2002 and Section 14A(a) and (b) of the Securities Exchange Act of 1934. Such sections are provided below:

- Section 404(b) of the Sarbanes-Oxley Act of 2002 requires a public company’s auditor to attest to, and report on, management’s assessment of its internal controls.
- Sections 14A(a) and (b) of the Securities and Exchange Act, implemented by Section 951 of the Dodd-Frank Act, require companies to hold shareholder advisory votes on executive compensation and golden parachute compensation.

As long as we qualify as an emerging growth company, we will not be required to comply with the requirements of Section 404(b) of the Sarbanes-Oxley Act of 2002 and Section 14A(a) and (b) of the Securities Exchange Act of 1934.

SPECIAL NOTE ABOUT FORWARD-LOOKING STATEMENTS

This prospectus and other materials filed or to be filed by us, as well as information in oral statements or other written statements made or to be made by us, contain statements, including in this document under the captions “*Prospectus Summary*,” “*Risk Factors*,” “*Capitalization and Financing*,” “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*,” and “*Business*”, that are, or may be considered to be, forward-looking statements. All statements that are not historical facts, including statements about our beliefs or expectations, are forward-looking statements. You can identify these forward-looking statements by the use of forward-looking words such as “outlook,” “believes,” “expects,” “potential,” “continues,” “may,” “will,” “should,” “seeks,” “approximately,” “predicts,” “intends,” “plans,” “estimates,” “anticipates,” “foresees” or the negative version of those words or other comparable words and phrases. Any forward-looking statements contained in this information statement are based on our historical performance and on current plans, estimates and expectations. The inclusion of this forward-looking information should not be regarded as a representation by us or any other person that the future plans, estimates or expectations contemplated by us will be achieved. There may be events in the future that we are not able to predict accurately or control. The factors listed under “*Risk Factors*,” as well as any cautionary language in this information statement, provide examples of risks, uncertainties and events that may cause our results to differ materially from the expectations we describe in our forward-looking statements. You should be aware that the occurrence of the events described in these risk factors and elsewhere in this information statement could have a material adverse effect on our business, results of operations and financial position.

Forward-looking statements, whether express or implied, are not guarantees of future performance and are subject to risks and uncertainties that can cause actual results to differ materially from those currently anticipated due to a number of factors, which include, but are not limited to:

- risks that we may not have sufficient capital in the amounts and at the times needed to finance our business;
- risks associated with our future revenue source dependent on a new product line not yet in production;
- risks that any future potential revenue opportunities from customers may not materialize to any meaningful degree or at all;
- risks of delays or unforeseen technical obstacles in arranging production and bringing our new product line to market;
- absence of a public market for our Common Stock;
- our ability to attract and retain qualified personnel and key employees;
- our ability to establish financial, administrative and other support functions;
- difficulty in predicting the timing or outcome of new product development efforts;
- the amount and timing of costs associated with research and development of our product line;
- our ability to generate operating revenue;
- market adoption of our principal product;
- the competitive nature of the industry in which we compete;
- the availability and price of acceptable raw materials and components from third-party suppliers;
- volatility in the financial markets;

- any adverse outcome in litigation to which we may become a party;
- general economic, political and business conditions that adversely affect our company or our suppliers or any company to which we sell our products;
- changes in costs, including changes in labor costs and raw material prices;
- the impact on our product development of patents and other proprietary rights licensed or owned by us; and
- the ability to successfully have our products manufactured in an efficient, time-sensitive and cost-effective manner.

You should read this information statement completely and with the understanding that actual future results may be materially different than expectations. All forward-looking statements made in this prospectus are qualified by these cautionary statements. These forward-looking statements are made only as of the date of this prospectus, and we do not undertake any obligation (and we expressly disclaim any such obligation), other than as may be required by law, to update or revise any forward-looking statements to reflect changes in assumptions, the occurrence of unanticipated events or changes in future operating results over time or otherwise.

USE OF PROCEEDS

Any proceeds received from the sale of the Shares will be deposited directly into the operating account of the Company. We will be attempting to raise up to \$4 million, minus expenses of approximately \$50,000 from the sale of the Shares. These proceeds will be used as follows:

	100%	75%	50%	25%
Gross Proceeds	\$ 4,000,000	\$ 3,000,000	\$ 2,000,000	\$ 1,000,000
Less Offering Expenses	(50,000)	(50,000)	(50,000)	(50,000)
NET OFFERING PROCEEDS	\$ 3,950,000	\$ 2,950,000	\$ 1,950,000	\$ 950,000
Research, Development and Tooling	\$ 435,000	\$ 435,000	\$ 435,000	\$ 435,000
Sales and Marketing	\$ 410,000	\$ 410,000	\$ 410,000	\$ 210,000
General Corporate Expense	\$ 305,000	\$ 305,000	\$ 305,000	\$ 305,000
Working Capital	\$ 2,800,000	\$ 1,800,000	\$ 800,000	\$ -0-

Our offering expenses are comprised of legal and accounting expenses. Our officers and directors will not receive any compensation for their efforts in selling the Shares.

Research and development expense primarily relates to developing new security products while tooling costs consist primarily of upfront tooling costs to reduce the cost of BolaWrap™ 100 components. Sales and marketing expense includes staffing costs, product promotion costs and travel and customer support activities. General corporate expense includes staffing and public company costs. Working capital may also consist of capacity and staffing expansion and administrative expense.

In the event we are not successful in selling Shares resulting in gross proceeds of at least \$1.0 million, we would utilize any available funds raised in the following order of priority:

- For general and administrative expenses, including legal and accounting fees and administrative support expenses incurred in connection with our reporting obligations with the Securities and Exchange Commission (“SEC”);
- For research, development and tooling;
and
- For general corporate expenses.

We estimate the need to raise a minimum of \$1.5 million to implement our plan of operations and provide sufficient working capital for production and to finance sales operations.

MARKET PRICE OF COMMON STOCK AND RELATED MATTERS

Market Information

There has been no public trading market for the shares of the Company's Common Stock. We intend to apply to list our Common Stock on the OTCBB such that a secondary market will commence following the offering.

Holders

As of July 27, 2017, there were approximately 15 shareholders of record of our Common Stock and no holders of record of our preferred stock. Our transfer agent is Colonial Stock Transfer Company. Their telephone number is (801) 355-5740.

ABSENCE OF PUBLIC MARKET AND DIVIDEND POLICY

Public Market

While not currently a reporting company, we will become a Section 15(d) reporting company as a result of the consummation of the offering.

Dividend Policy

The payment of dividends is subject to the discretion of our board of directors and will depend, among other things, upon our earnings, our capital requirements, our financial condition and other relevant factors. We have not paid or declared any dividends upon our Common Stock since our inception and, by reason of our present financial status and our contemplated financial requirements do not anticipate paying any dividends upon our Common Stock in the foreseeable future. Therefore, there can be no assurance that any dividends on the Common Stock will ever be paid.

CAPITALIZATION AND FINANCING

The following sets forth our capitalization as of March 31, 2017 that is derived from our unaudited financial information included elsewhere in this prospectus:

	Historical (unaudited)
Cash	\$ 344,629
Stockholders' equity:	
Preferred stock	-0-
Common stock	2,000
Additional paid-in capital	665,500
Accumulated deficit	(436,111)
Total stockholders' equity	<u>\$ 231,389</u>
Total capitalization	<u>\$ 231,389</u>

This table does not give effect to the receipt or application of proceeds from the sale and issuance by us of up to 2,666,666 shares of Common Stock in this offering, since the offering is being conducted on a best efforts basis with no minimum required. This table should be read in conjunction with "*Management's Discussion and Analysis of Financial Condition and Results of Operations*" and our historical financial statements, notes and pro forma information included elsewhere in this prospectus.

DILUTION

Dilution represents the difference between the offering price and the net tangible book value per share immediately after completion of this offering. Net tangible book value is the amount that results from subtracting total liabilities and intangible assets from total assets. Dilution arises mainly as a result of our arbitrary determination of the offering price of the shares of Common Stock being offered. Dilution of the value of the Common Stock you purchase is also a result of the lower book value of the shares held by our existing shareholders.

As of March 31, 2017, the net tangible book value of our Common Stock was \$231,389 or approximately \$0.01 per share based upon 20.0 million shares of Common Stock issued and outstanding.

If 100% of the Shares Are Sold:

Upon completion of this offering, in the event all of the shares are sold, the net tangible book value of the 23,141,666 shares of Common Stock to be outstanding will be \$4,231,389 or approximately \$0.18 per share. Our post offering proforma net tangible book value gives effect to the net proceeds of this offering and also takes into account the private placement of 475,000 shares of Common Stock we completed in July 2017. The net tangible book value of the shares of Common Stock held by our existing shareholders will be increased by \$0.17 per share without any additional investment on their part. Investors in the offering will incur an immediate dilution of \$1.32 per share of Common Stock to \$0.18 per share.

After completion of this offering, if 2,666,666 shares of Common Stock are sold, investors in the offering will own 11.5% of the total number of shares then outstanding for which they will have made cash investment of \$4 million, or \$1.50 per share. Our existing shareholders will own 88.5% of the total number of shares of Common Stock then outstanding, for which they have made contributions of cash totaling \$0.035 per share.

Upon completion of this offering, in the event all Shares are not sold, the following table details the range of possible outcomes from the offering assuming the sale of 100%, 75%, 50% and 25%.

Funding Level	\$ 4,000,000	\$ 3,000,000	\$ 2,000,000	\$ 1,000,000
Offering price	\$ 1.50	\$ 1.50	\$ 1.50	\$ 1.50
Net tangible book value per common share before offering ⁽¹⁾	\$ 0.01	\$ 0.01	\$ 0.01	\$ 0.01
Pro forma net tangible book value per common share after offering	\$ 0.18	\$ 0.14	\$ 0.10	\$ 0.06
Dilution to investors	\$ 1.32	\$ 1.36	\$ 1.40	\$ 1.44
Dilution as a percentage of offering price	88%	91%	93%	96%

⁽¹⁾ Based on 20,000,000 shares of Common Stock outstanding as of March 31, 2017 and total stockholder's equity of \$231,389 utilizing unaudited financial statements.

Since inception, the officers, directors, promoters and affiliated persons have paid an aggregate average price of \$0.024 per share of Common Stock in comparison to the offering price of \$1.50 per share of Common Stock, set forth on the cover page of this prospectus.

Further Dilution

The Company may issue equity and debt securities in the future. These issuances and any sales of additional Common Stock may have a depressive effect upon the market price of the Company's Common Stock and investors in this offering.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion in conjunction with the financial statements and other financial information included elsewhere in this information statement. The following discussion may contain forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could differ materially from those discussed in these forward-looking statements. Factors that could cause or contribute to these differences include, but are not limited to, those discussed below and elsewhere in this information statement, particularly in "Risk Factors" and "Special Note About Forward-Looking Statements."

We are a security technology company organized in March 2016 focused on delivering solutions to customers, primarily law enforcement and security personnel. We plan to introduce our first product, the BolaWrap™ 100, during 2017. We do not expect to report revenues until production quantities are available for sale to customers. There can be no assurance regarding the timing or amount of future revenues from this product, if any.

Organization and Reverse Capitalization

Our Company resulted from the March 31, 2017 merger of Wrap Technologies, LLC ("Wrap LLC") with and into our wholly-owned subsidiary MegaWest Energy Montana Corp. ("MegaWest"). Wrap LLC ceased separate existence with MegaWest continuing as the surviving entity. MegaWest changed its name to Wrap Technologies, Inc. and amended and restated new articles of incorporation authorizing 150,000,000 shares of Common Stock, par value \$0.0001, and 5,000,000 shares of preferred stock, par value \$0.0001. All issued and outstanding 835.75 membership units of Wrap LLC were exchanged for 20.0 million shares of Common Stock of the Company.

Wrap LLC acquired privately held MegaWest from Petro River Oil Corp. ("Petro River") on March 22, 2017 through the issuance of 16.75 membership units, representing a 2% membership interest in Wrap LLC. Petro River is owned 11% by Scot Cohen, its Executive Chairman, who also was a Manager and the owner of a 26% membership interest in Wrap LLC, and is currently the Executive Chairman and Secretary of the Company. MegaWest had no assets or liabilities at the date of acquisition nor at December 31, 2016, and is not considered an operating business.

Wrap LLC's acquisition of MegaWest and its subsequent merger with and into MegaWest as a wholly-owned subsidiary of the Company, and exchange of membership interests for Common Stock has been accounted for as a reverse recapitalization of Wrap LLC (the "Recapitalization"). Wrap LLC, now the Company as a result of the Recapitalization, is deemed the accounting acquirer with MegaWest the accounting acquiree. Our financial statements are in substance those of Wrap LLC and are deemed to be a continuation of its business from its inception date of March 2, 2016. The Company's balance sheet continues at historical cost as the accounting acquiree had no assets or liabilities and no goodwill or intangible assets were recorded as part of the Recapitalization.

To reflect the Recapitalization, historical shares of Common Stock and additional paid-in capital have been retroactively adjusted using the exchange ratio of approximately 23,930.60 shares of Common Stock for each membership unit of Wrap LLC.

Basis of Presentation – Going Concern

Since inception in March 2016, we have generated significant losses from operations and anticipate that we will continue to generate significant losses from operations for the foreseeable future. In order to continue as a going concern, our business will require substantial additional investment that has not yet been secured. Our loss from operations was \$234,356 for the period ended December 31, 2016 and \$201,755 for the three months ended March 31, 2017. The net cash used from operations and investing was \$187,428 for the period ended December 31, 2016 and \$135,443 for the three months ended March 31, 2017. On March 31, 2017, we had \$344,629 in cash. As of March 31, 2017, our obligations included \$155,050 of current liabilities and lease commitments of approximately \$48,300.

Our management has concluded that due to the conditions described above, there is substantial doubt about our ability to continue as a going concern through April 17, 2018.

Management has evaluated the significance of the conditions in relation to our ability to meet our obligations and believes that the current cash balance will provide sufficient capital to continue operations through approximately June 2017. While we plan to raise capital to address our capital deficiencies and meet our operating cash requirements, there is no assurance that our plans will be successful. Management cannot assure you that financing will be available on favorable terms or at all. Additionally, if additional capital is raised through the sale of equity or convertible debt securities, the issuance of such securities would result in dilution to our existing shareholders. Furthermore, despite management's optimism regarding our technology and planned products, even in the event that the Company is adequately funded, there is no guarantee that any products or product candidates will perform as hoped or that such products can be successfully commercialized.

Equity Compensation Plan

On March 31, 2017, the Company approved the 2017 Equity Compensation Plan (the "*Plan*"). The Plan provides for the granting of nonqualified stock options, incentive stock options, and restricted stock grants and units. The Plan allows for an issuance of a maximum of 2,000,000 shares of Common Stock, with awards made at the discretion of the board of directors. No awards have been made to date. The Company plans to issue stock options in the future to executive officers, directors, employees and consultants.

Challenges, Opportunities, and Uncertainties

We will be required to establish and grow business functions including production, marketing, sales, distribution, service and administration. Until we generate revenues and margins or obtain additional financing, we expect to have limited personnel to accomplish these functions and will primarily rely on our executives along with outside consultants and suppliers we intend to engage for production and certain other services. Given our limited personnel, there is risk and uncertainty whether we can timely accomplish required functional activities and achieve important milestones, including introducing new products and obtaining orders from new customers.

We are unable to predict the market acceptance of our new product or the level of future sales, if any. We have not yet commenced marketing our new product and have no orders or customers for our products.

We will be reliant on existing financial resources to provide initial working capital. We will need additional capital to finish development and marketing of our new product line and working capital to produce product for sale to customers. Obtaining any required additional financing in the future could be a significant management challenge and failure to secure necessary financing would have a material adverse affect on our operations. Our ability to continue as a going concern is dependent upon achieving a profitable level of operations and until then obtaining additional financing.

Given our limited personnel and financial resources we face significant challenges in establishing, operating and growing our new business. We expect we will need to continue to innovate new applications for our security technology, develop new products and technologies to meet diverse customer requirements and identify and develop new markets for our products.

Critical Accounting Policies and Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States, which we refer to as U.S. GAAP, requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to recognition and measurement of contingencies and accrued costs. We base our estimates on historical experience and on various other assumptions we believe to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions.

Until consummation of the Recapitalization on March 31, 2017, we were treated as a partnership for federal and state income tax purposes and did not incur income taxes. Instead, our losses were included in the income tax returns of the member partners. Following the Recapitalization, we will be responsible for federal, state and foreign taxes for jurisdictions in which we conduct business. As part of the process of preparing our financial statements we will be required to estimate our provision for income taxes. Significant management judgment will be required in determining our provision for income taxes, deferred tax assets and liabilities, tax contingencies, unrecognized tax benefits, and any required valuation allowance, including taking into consideration the probability of the tax contingencies being incurred. Management expects to assess this probability based upon information provided by its tax advisers, its legal advisers and similar tax cases. If at a later time its assessment of the probability of these tax contingencies changes, its accrual for such tax uncertainties may increase or decrease. Our effective tax rate for annual and interim reporting periods could be impacted if uncertain tax positions that are not recognized are settled at an amount which differs from our estimates.

Operating Expense

Our operating expenses have included (i) selling, general and administrative expense, and (ii) research and development expense. Research and development expense comprises the costs incurred in performing research and development activities on our behalf, including compensation and consulting, design and prototype costs, contract services, patent costs and other outside expenses. The scope and magnitude of our future research and development expense is difficult to predict at this time and will depend on elections made regarding research projects, staffing levels and outside consulting and contract costs. The actual level of future selling, general and administrative expense will be dependent on staffing levels, elections regarding the use of outside resources, public company and regulatory costs, and other factors, some outside our control. Our operating costs could increase rapidly as we introduce our product and expand our research and development, production, distribution, service and administrative functions in future months. We may also incur future financing costs and substantial noncash stock-based compensation costs depending on future option grants that are impacted by stock prices and other valuation factors. Historical expenditures are not indicative of future expenditures.

Results of Operations

Three Months Ended March 31, 2017 Compared to the Period from Inception (March 2, 2016) to March 31, 2016

We had no revenues or product costs for the three months ended March 31, 2017 nor for the prior period including from inception (March 2, 2016) to March 31, 2016 (“*prior short period*”).

Selling, General and Administrative Expense. Selling, general and administrative expense for the three month period ended March 31, 2017 were \$75,792 compared to \$3,690 for the prior short period ended March 31, 2016. The most recent period included legal, merger and audit costs of \$36,893, compensation of \$11,000, occupancy costs of \$4,640 and trade show preparation and marketing costs of \$8,507. The prior short period included startup legal and organization costs of \$3,390.

Research and Development Expense. Research and development expense for the period ended March 31, 2017 was \$125,963 and included \$14,000 of deferred related party research costs, consulting and contract research costs of \$75,063, patent costs of \$15,337, and prototype and supply costs of \$13,489. This compared to \$27,909 for the prior short period ended March 31, 2016 including \$7,000 of deferred related party research costs, \$4,711 of prototype and supply costs and \$14,043 of patent costs.

Net Loss. Our net loss for the three-month period ended March 31, 2017 was \$201,755 compared to a net loss of \$31,599 for the prior short period ending March 31, 2016 when development activities were just beginning.

Period from Inception (March 2, 2016) to December 31, 2016

The following is a discussion of the results of our operations for the period from inception (March 2, 2016) to December 31, 2016. Due to the inception date there is no prior comparable period. We had no revenues or product costs during the period.

Selling, General and Administrative Expense. Selling, general and administrative expense for the period ended December 31, 2016 was \$17,112, and included startup legal and organization costs of \$11,207, marketing costs of \$2,300, and administrative costs of \$3,605.

Research and Development Expense. Research and development expense for the period ended December 31, 2016 was \$217,244, and included \$70,000 of deferred related party research costs, consulting and contract research costs of \$95,525, patent costs of \$33,141, and prototype and supply costs of \$15,313.

Net Loss. Our net loss for the period ended December 31, 2016 was \$234,356.

Liquidity and Capital Resources

Overview. Our sole source of liquidity has been funding from our shareholders. We expect our primary source of future liquidity will be from the sale of future product, if any, and any future equity or debt financings.

Capital Requirements. Other than \$344,629 cash on hand at March 31, 2017, we have no additional sources of liquidity. We cannot currently estimate our future liquidity requirements or future capital needs which will depend on capital required to introduce our new product and the staffing and support required along with the timing and amount of future revenues and product costs. We anticipate that demands for operating and working capital could grow rapidly based on decisions regarding staffing, development, production, marketing and other functions and based on factors outside our control. Accordingly additional capital will be required during the next twelve months. No assurances can be provided that any future debt or equity capital will be available to us. Failure to quickly produce and sell our new product and timely obtain any required additional capital in the future will have a material adverse affect on the Company. Our ability to continue as a going concern is in substantial doubt and is dependent upon achieving a profitable level of operations and until then obtaining additional capital.

Our future capital requirements, cash flows and results of operations could be affected by and will depend on many factors that are currently unknown to us, including:

- the timing of the availability of our new product line for sale to customers;
- decisions regarding staffing, development, production, marketing and other functions;
- the timing and extent of any market acceptance of our products;
- the costs, timing and outcome of planned production and required customer and regulatory compliance of our new products;
- the costs of preparing, filing and prosecuting our patent applications and defending any future intellectual property-related claims;
- the costs and timing of additional product development;
- the costs, timing and outcome of any future warranty claims or litigation against us associated with any of our products; and
- the timing and costs associated with any new financing.

Cash Flow

Operating Activities. During the period ended March 31, 2017, net cash used in operating activities was \$131,347. The net loss of \$201,755 was reduced by \$26,000 of deferred and accrued officer compensation and \$44,085 of accounts payable and accruals.

During the period ended December 31, 2016, net cash used in operating activities was \$177,890. The net loss of \$234,356 was increased by \$29,811 of prepaid expenses and deposits and reduced by \$70,000 of deferred officer compensation and \$14,965 of accounts payable and accruals.

Investing Activities. We used \$4,096 and \$9,538 of cash for the purchase of property and equipment during the three month period ended March 31, 2017 and the period from inception to December 31, 2016, respectively.

Financing Activities. We obtained \$442,500 of cash from our shareholders during the period ended December 31, 2016. During the period ended March 31, 2017 we obtained an additional \$225,000 of cash from our shareholders.

Contractual Obligations

Other than our facility lease of approximately \$18,100 per year, we have no contractual obligations. We are obligated to pay to Syzygy Licensing, LLC ("Syzygy") a 4% royalty on future product sales up to an aggregate of \$1.0 million in royalties.

Effects of Inflation

We do not believe that inflation has had a material impact on our business, revenues or operating results during the period presented.

Recent Accounting Pronouncements

There have been no recent accounting pronouncements or changes in accounting pronouncements during the period ended March 31, 2017, or subsequently thereto, that we believe are of potential significance to our financial statements.

BUSINESS

Overview

We are a security technology company focused on delivering innovative solutions to customers, primarily law enforcement and security personnel. We plan to introduce our first product, the BolaWrap™ 100, during 2017.

Our BolaWrap™ 100 product is a hand-held remote restraint device that discharges an eight-foot bola style Kevlar® tether to entangle an individual at a range of 10-25 feet. Inspired by law enforcement professionals, the small but powerful BolaWrap™ 100 assists law enforcement to safely and effectively control encounters. Law enforcement agencies authorize a continuum of force options:

- verbal commands;
- physical control – soft techniques of grabs and holds progressing to hard techniques such as punches and kicks;
- less-lethal weapons - batons, pepper spray, impact munitions and conducted electrical weapons (“CEWs”); and
- lethal force – deadly weapons such as firearms.

BolaWrap™ 100 offers law enforcement a new tool to remotely and temporarily control an individual or impede flight by targeting and wrapping an individual’s legs.

The small, light but rugged BolaWrap™ 100 is designed for weak hand operation to provide remote restraint while other use of force continuum options remain open. The design offers wide latitude of accuracy to engage and restrain targeted legs of a subject. Quick eject and rapid reload of bola cartridges allows one device to be reused in a single encounter or in multiple encounters.

Illustration of Bola Wrapping and Wide Latitude of Accuracy

Entanglement Wrapping Illustration

There are limited effective options for remote engagement so when verbal commands go unheeded law enforcement is faced with either hands on engagement or other potentially injurious less lethal or lethal force. We believe our new tool is essential to meet modern policing requirements with individuals frequently not responding to verbal commands and to assuage public demands for less lethal policing. We believe our device minimizes the need to employ other uses of force including combat and less-lethal weapons. Many less-lethal weapons rely on “pain compliance” often escalating encounters with potential for injury.

Primary use cases fall into the two broad categories routinely encountered by law enforcement and security personnel:

- Remotely retain and limit the mobility of an individual attempting to evade arrest or questioning. Individuals increasingly ignore law enforcement verbal commands; and
- Assist in subduing individuals actively resisting arrest by limiting mobility, possibly making other engagement options less risky to officers and less injurious to individuals.

We intend to commercialize the BolaWrap™ 100 by initially targeting sales to the approximately 18,000 United States law enforcement agencies with approximately 765,000 full time officers and to the United States Border Patrol with 21,000 border patrol agents. Thereafter, we intend to target law enforcement agencies and security personnel worldwide.

Although we are working towards commercialization of BolaWrap™ 100, we have not yet established supplier or production arrangements. We have not generated any revenues to date, have no customers and currently have no products available for sale. Sale of our planned products may require additional governmental licenses or approvals that we have not yet obtained. Our independent registered public accounting firm stated in their audit opinion issued in connection with our balance sheet and other financial statements as of December 31, 2016 that our net losses and our requirement to secure additional financing raised substantial doubt about our ability to continue as a going concern. We had an accumulated deficit as of March 31, 2017 of \$436,111. See “*Risk Factors*” included in this prospectus for additional information regarding risks and uncertainties associated with our business.

History

We were organized as Wrap Technologies, LLC, a Delaware limited liability company on March 2, 2016 by our founders Elwood G. Norris, Scot Cohen and James A. Barnes. We are headquartered in Las Vegas, Nevada. Our formation followed several months of research into ensnarement techniques by our Chief Technology Officer and primary inventor, Mr. Norris. Mr. Norris has been granted over 80 U.S. patents, and with Mr. Barnes, founded LRAD Corporation (Nasdaq:LRAD), a company engaged in directed sound technologies including non-lethal acoustic hailing and warning devices sold worldwide for law enforcement, military, government and security markets.

MegaWest Merger

On March 22, 2017, we acquired MegaWest Energy Montana Corp., a wholly-owned subsidiary, from Petro River Oil Corp. (“*MegaWest*”), and on March 31, 2017, we merged with MegaWest, and changed our name to Wrap Technologies, Inc., a Delaware corporation (the “*Merger*”). Petro River is an independent energy company focused on the exploration and development of conventional oil and gas assets with low discovery and development costs. Petro River is currently focused on moving forward with drilling wells on several of its properties owned directly and indirectly through its subsidiaries and other interests. In light of the challenging oil price environment and capital, Petro River is focusing on specific target acquisitions and investments, including farm-in and joint venture opportunities for the Company’s oil and gas assets, and limiting operating expenses outside of its oil and gas assets.

Our original members retained approximately 98% ownership interest following the Merger and Petro River Oil Corp. (“*Petro River*”) retained an approximate 2% ownership interest in the Company following the Merger. At some future date, Petro River may distribute the shares of Common Stock received in connection with the MegaWest Merger to its shareholders as a dividend. Our near term goals for our business include raising sufficient capital to commercialize BolaWrap™ 100, develop additional versions of the technology, and develop new technologies and products. Achieving these goals will require offerings of securities by us, including the offering described elsewhere in this prospectus. We believe operating as a business that will be separate and distinct from Petro River’s business will benefit our shareholders and allow us to pursue growth and capital funding opportunities with a capital structure that is tailored for our needs, separate from those of Petro River.

Plan of Operation

Our plan of operation for the remainder of 2017 includes establishing business functions including production, sales, distribution and service and growing our marketing and administration functions and maintaining our core research and development function. Following completion of the offering we expect to increase staffing including a sales manager and a production manager. We may also require additional production, distribution and service staff depending on the scale of operations.

Our research and development activities for the balance of 2017 will focus on tooling and production development for the sale of our first product, the BolaWrap 100 model during 2017. We expect to acquire tooling and thereafter engage in cost reduction activities to reduce the costs of components. We also expect to develop supply chain resources including contract production of parts and subassemblies. Working capital will be used to purchase minimum order quantities of key parts and components and maintaining finished goods to timely fulfill orders. Our research plans include focus on additional models of our restraining device and developing other security related products.

Other than tooling we have no plans for material acquisition of plant or equipment.

In addition to adding sales staffing, we expect to incur sales and product promotion costs along with customer support activities. This includes planned expenditures on travel, collateral materials, trade show expenses and website and social media promotion costs to support introduction of a new product to the law enforcement community.

Following completion of the offering, in addition to ongoing administrative costs, we will incur legal, accounting and filing costs of a public company.

We will require additional capital to execute our plan of operation for the balance of 2017 and for the next twelve months (see Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources on page 20 for additional discussion). There is no minimum offering amount, however should we be successful in raising gross proceeds of at least \$1,000,000 then management expects we will have sufficient capital for the balance of 2017 (see Use of Proceeds on page 16 for additional information including categories of planned expenditures). Failure to raise gross proceeds of a minimum of \$1,000,000 may require us to curtail the scale of our planned operations or raise additional funds in 2017.

Industry Background

The market for use of force related products and devices includes law enforcement agencies, correctional facilities, military agencies, private security guard companies and retail consumers. We believe law enforcement officials are the opinion leaders regarding market acceptance of new security products. We therefore intend to focus on the law enforcement agency segment of the market for our first product, the BolaWrap™ 100.

According to the Department of Justice, from 2002 to 2011 an annual average of 44 million U.S. residents age 16 or older - about 19% of all persons of this age - had at least one face-to-face contact with a police officer. About 1.6% or 715,500 involved threats of or use of force. And about 1.3 million were handcuffed during their encounter with police. Nearly all local police departments and all federal law enforcement agencies have a use-of-force policy that dictates the level of force its officers can use to respond to various situations. In January 2017, a collaborative effort among 11 significant law enforcement leadership and labor organizations in the United States resulted in the publication of a National Consensus Policy on Use of Force. This policy states, among other information:

- Officers shall use only the force that is objectively reasonable to effectively bring an incident under control, while protecting the safety of the officer and others;
- Officers shall use force only when no reasonably effective alternative appears to exist and shall use only the level of force which a reasonably prudent officer would use under the same or similar circumstances;
- An officer shall use de-escalation techniques and other alternatives to higher levels of force consistent with his or her training whenever possible and appropriate before resorting to force and to reduce the need for force; and
- When de-escalation techniques are not effective or appropriate, an officer may consider the use of less lethal force to control a non-compliant or actively resistant individual. An officer is authorized to use agency-approved, less lethal force techniques and issued equipment:
 - o to protect the officer or others from immediate physical harm;
 - o to restrain or subdue an individual who is actively resisting or evading arrest;
 - or
 - o to bring an unlawful situation safely and effectively under control.

A police officer is trained to use only the minimum force necessary to overcome the threat of injury or violence posed by a suspect. For example, under most policies, an officer may not use lethal force unless a subject poses a threat of significant bodily injury or fatality to the officer or other persons.

Studies have concluded that most police officers never deploy lethal force in the course of their careers. While the vast majority of law enforcement officers around the world are armed with firearms, only a small percentage will actually ever use them. Officers, however, use less lethal force on a regular basis. Traditional tactics such as using a control hold, baton, club, or combat to control a suspect may result not only in a risk of injury to the suspect, but also a risk that the officer will be injured. Other force options including chemical spray, impact munitions and CEWs not only risk injury but are often controversial. Each weapon available to law enforcement has distinct advantages and disadvantages, and we believe law enforcement agencies require different tools for different situations.

We believe a new remote restraining device is necessary to meet modern policing requirements with individuals frequently not responding to verbal commands and public demands for less lethal policing. A tool to restrain at a distance may offer reduced frequency of deployment of other control techniques including CEWs. We believe that the following characteristics for our new restraining product are the most important to law enforcement and security agencies:

- Effectiveness: remote restraint of individuals while keeping all other use of force options available;
- Range: variable distance over which the device is effective;
- Safety: minimal risk of injury or death;
- Ease of use: simple operation and low maintenance;
- Dependability: reliability in many environments, product durability;
- Accountability: tracking to reduce misuse of the weapon; and
- Cost: low cost per use and possible reduction of insurance and litigation expense.

The BolaWrap™ 100 Solution

The BolaWrap™ 100 is designed to perform well in terms of all of the above characteristics. We believe the BolaWrap™ 100 is a unique new device to restrain subjects safely and without eliminating any other use of force options necessary for the protection of law enforcement and the public. While no use of force technique or device is 100% effective, in our opinion, unique performance could make the BolaWrap™ 100 a tool of choice in a range of encounters for law enforcement agencies and other security services.

Effectiveness

Without an effective remote restraint device to assist controlling an encounter, law enforcement often defaults to less-lethal weapons that rely upon a pain response or electrical induced incapacitation for effect. These methods along with lethal force may be necessary for the most dangerous and aggressive suspects. However, there are many encounters where remote restraint may be an option in lieu of or before physical contact with an individual to reduce possibility for flight or the possibility for injury to the individual and the officer. In volunteer testing, the BolaWrap™ 100 has shown to be effective in restraining individuals hindering the flight ability and crippling the ability to fight allowing effective further officer action.

Range

Batons and chemical sprays can only be used from close distances, usually less than five feet. Rubber bullets, beanbag rounds, and similar less-lethal impact weapons must be used at distances greater than 30 feet to minimize suspects' injuries. Combat, come along and wrist locks require intimate contact with suspects. The BolaWrap™ 100 is designed to engage a suspect at 10 to 25 feet operable by the weak hand allowing other force options to remain available. The design of the device makes it ineffective and it is not recommended for use at close distances, less than ten feet.

Safety

The BolaWrap™ 100 is not intended as a weapon. It does not rely on pain or electrical induced incapacitation for effectiveness. The wrapping effect is intended to impede flight while not inducing uncontrolled falls or injury. There is no issue of recovery time as the case with CEW, impact munitions or chemical devices.

Ease of Use

The BolaWrap™ 100 is small, light and rugged. It is designed to be operated as a weak hand device. It is simple to use, activate and deploy. It can be reloaded and deployed again as quickly as a spent cartridge can be removed and a replacement cartridge inserted, typically in less than five seconds. Further, the weapon requires no maintenance, there are no electronic components. The BolaWrap™ 100 also does not leave contaminating residues, unlike chemical sprays that may contaminate buildings, vehicles or other closed facilities or officer uniforms.

Dependability

The BolaWrap™ 100 as a mechanical device operates effectively under a variety of unfavorable conditions, such as wind and rain, and is rugged and durable.

Accountability

The BolaWrap™ 100 is designed for professional use and not consumer use. Each device and each cartridge is identified with a serial number for recordkeeping purposes.

Cost

The BolaWrap™ 100 is intended to be sold to law enforcement agencies at a price per unit not yet established. The single use bola cartridge ammunition is intended to be priced at a per cartridge price to allow use in both training and active deployment. While we do not believe there is a directly competitive remote restraint device, and we expect prices to be competitive with CEWs, impact munitions and most other specialized less-lethal weapons, with the exception of the least expensive chemical sprays. However, the indirect costs of decontaminating buildings, vehicles, and uniforms resulting from the use of chemical sprays can place these sprays at an overall cost disadvantage per use.

In addition, litigation and insurance costs for law enforcement agencies can be significant. Reducing the need for other use of force tools and the number of injuries and fatalities caused by law enforcement officers may reduce the number of suits filed against agencies for excessive use of force, wrongful death and injury.

We believe the addition of a new remote restraint device may have the benefit of increasing goodwill between law enforcement agencies and their communities. Community relations considerations can be particularly important at a time when almost any interaction with police can be recorded and scrutinized by the media and the public.

Product

Our BolaWrap™ 100 product is a hand-held remote restraint device that discharges an eight-foot bola style Kevlar® tether to entangle an individual at a range of 10-25 feet. BolaWrap™ 100 offers law enforcement a new tool to remotely engage and temporarily control individuals.

The small, light but rugged BolaWrap™ 100 is designed for weak hand operation to provide remote restraint while other use of force continuum options remain open. The design offers wide latitude of accuracy to engage and restrain targeted legs of a subject. Quick eject and rapid reload of bola cartridges allows one device to be reused in a single encounter or in multiple encounters.

The bola cartridge contains two sockets that discharge two small pellets at a thirty degree angle. The pellets are linked by the eight-foot Kevlar tether such that the tether first engages an individual's legs then the force of the pellets causes the tether to wrap. Small barbs on each pellet engage clothing to retard the unwinding of the bola tether wrap. The bola cartridge contains a 9 mm fractional charge blank cartridge (as used in prop guns) to discharge the tether.

The durable body of the BolaWrap™ 100 contains a receptacle for the bola cartridge along with the activation, deployment and safety mechanisms. Bola cartridges are quickly ejected allowing rapid reloading, activation and deployment.

We demonstrated our first prototype device in December 2016 and developed pre-manufacturing demonstration units in early April 2017 for planned production and sales in the fourth quarter of 2017.

Markets

Law Enforcement and Corrections

Federal, state and local law enforcement agencies in the United States currently represent the primary target market for the BolaWrap™ 100. According to United States Bureau of Justice statistics, there were nearly 18,000 of these agencies in the United States in 2008 that employed about 765,000 full-time, sworn law enforcement officers. In 2005, the United States Bureau of Justice statistics estimated that there were 295,000 correctional officers in over 1,800 federal and state correctional facilities in the United States.

United States Border Patrol (USBP)

With over 21,000 agents, this is one of the largest law enforcement agencies in the United States with a large number of encounters with individuals requiring soft engagement techniques. We believe the BolaWrap™ 100 can be an effective tool to safely assist in detention of individuals subject to the agency's jurisdiction. The BolaWrap™ 100 offers an additional tool for frontline agents to de-escalate encounters while effecting agent responsibilities.

Private Security Firms and Guard Services

According to 2015 Bureau of Labor Statistics there were approximately 1.1 million privately employed security guards in the United States. They represent a broad range of individuals, including investigation and security services, hospitals, schools, local government, and others. We believe that some security personnel armed with BolaWrap™ 100 could be effective to de-escalate some encounters without eliminating other tools available today. Providing guards with BolaWrap™ 100 may reduce the potential liability of private security companies and personnel in such encounters.

Although there are use cases in correctional facilities and by certain military policing personnel we are initially targeting BolaWrap™ 100 for law enforcement and security personnel markets. We do not currently plan a consumer version of the device.

Selling and Marketing

Law enforcement agencies represent our primary target market. In this market, we expect that the decision to purchase the BolaWrap™ 100 will normally be made by a group of people including the agency head, his training staff, and use of force and weapons experts. The decision sometimes involves political decision-makers such as city council members. While we expect the decision-making process for a remote restraint device will be less controversial than that for less-lethal products such as CEWs, we still expect the process to take as little as a few weeks or as long as a year or more partially due to budgeting reasons.

While initial sales will be made by our executive and sales employees, we may determine to utilize existing networks of independent regional police equipment distributors compensated on a commission and incentive basis.

Most law enforcement and corrections agencies will not purchase new use of force devices until a training program is in place to certify officers in their proper use. We are developing and intend to offer training and class materials that certify law enforcement trainers as instructors in the use and limitations of the BolaWrap™ 100.

In addition to our planned training, we plan to participate in a variety of trade shows and conferences. We expect our marketing efforts will also benefit from significant free media coverage. Other marketing communications may include video e-mails, press releases, and conventional print advertising in law enforcement trade publications. We are designing a website to contain similar marketing information and are developing social media outreach and communications.

Our Strategy

Our goal is to realize the potential of a new remote restraint device targeting law enforcement and security personnel. We aim to produce a product line starting with the BolaWrap™ 100 to meet the requirements of these customers. The key elements of our strategy include:

- Produce a product line meeting customer requirements as a new tool to aid in the retention of individuals to make encounters more effective and less dangerous to law enforcement and the public;
- Develop a robust production and supply system to support our customers;
and
- Develop relationships with customers requiring large numbers of products mainly larger city police departments and larger agencies.

We also plan to explore markets for use by security and related personnel and develop international distribution.

Related Party License and Royalties

We are obligated to pay royalties pursuant to an exclusive Amended and Restated Intellectual Property License Agreement, dated as of September 30, 2016, with Syzygy Licensing, LLC (“Syzygy”), a private technology invention, consulting and licensing company owned and controlled by Elwood G. Norris and James A. Barnes, both officers and shareholders of the Company. Syzygy has no ongoing operations, and does not engage in any manufacturing, production or other related activities.

The agreement provides for the payment of royalties of 4% of revenues from products employing the licensed device technology up to the earlier to occur of (i) the payment by the Company of an aggregate of \$1.0 million in royalties, or (ii) September 30, 2026. All development and patent costs have been paid by us and patent applications and the technology related to the BolaWrap™ 100 have been assigned to the Company, subject to the royalty obligation.

Manufacturing and Suppliers

We have substantially completed the design and component selection for the BolaWrap™ 100. We are sourcing components from a variety of suppliers with final assembly, testing and shipping occurring in our facility in Las Vegas, Nevada. We believe arranging and maintaining quality manufacturing capacity will be essential to the performance of our products and the growth of our business.

Warranties

We expect to warrant our products to be free from defects in materials and workmanship for a period up to one year from the date of purchase. The warranty will be generally a limited warranty, and in some instances impose certain shipping costs on the customer. We expect in most cases it will be more economical and effective to replace the defective device rather than repair.

Competition

While we are targeting the BolaWrap™ 100 as a new solution for law enforcement and not as a replacement for other tools currently in use, we will still compete with other use of force products for budgets. Law enforcement agencies may also determine that we are an alternative to other solutions in spite of such positioning.

Other use of force devices including CEWs sold by Axon Enterprises, Inc. (formerly Taser International, Inc.), and pepper spray, batons, impact weapons sold by companies such as Defense Technology will compete with the BolaWrap™ 100 indirectly. Many law enforcement and corrections personnel consider such less-lethal weapons to be distinct tools, each best-suited to a particular set of circumstances. Consistent with this tool kit approach, purchasing any given tool does not preclude the purchase of one or several more. In other cases, budgetary considerations and limited space on officers' belts dictate that only a limited number of devices will be purchased and carried. We believe the BolaWrap™ 100's unique remote restraint use, effectiveness, and low possibility of injury will enable it to compete effectively against other alternatives.

Many of our present and potential future competitors have, or may have, substantially greater resources to devote to compete in the law enforcement market and to further technological and new product developments. Also, these competitors or others may introduce products with features and performance competitive to our product.

Seasonality

We do not expect to experience any significant seasonality trends. Seasonality trends may occur in the future.

Government Regulation

The BolaWrap™ 100 is classified as a "firearm" by the U.S. Bureau of Alcohol, Tobacco, Firearms and Explosives ("ATF"), and is subject to federal firearms-related regulations. We hold a Federal Firearms Manufacturing License expiring in 2020. Many states also have regulations restricting the sale and use of certain firearms and may determine their own classification and restrictions irrespective of ATF regulation. In many cases, the law enforcement and corrections market is subject to different ATF and state regulations. Where different regulations exist, we expect that the regulations affecting the private citizen market may also apply to the private security markets, except as the applicable regulations otherwise specifically provide.

BolaWrap™ 100 may also be considered a firearm or a crime control product by the U.S. government. Accordingly, the export of our devices will be regulated under export administration regulations. As a result, we must obtain export licenses from the Department of Commerce for all shipments to foreign countries other than Canada. We do not expect the need to obtain these licenses will cause a material delay in any future foreign shipments. Export regulations also prohibit the further shipment of our products from foreign markets in which we hold a valid export license to foreign markets in which we do not hold an export license for our products.

Foreign regulations, which may affect our device, and sale thereof, are numerous and often unclear. We expect to work with a distributor or advisor who is familiar with the applicable import regulations in each of any future foreign markets.

Intellectual Property

We intend to protect our intellectual property assets including pending patents, trademarks and trade dress and trade secrets such as know-how. In addition, we use confidentiality agreements with employees and some suppliers to ensure the safety of our trade secrets. We have three U.S. patents pending and intend to extend protection in certain other foreign jurisdictions. We have filed for trade name protection for "BolaWrap" and expect to employ a combination of registered and common law trade names, trademarks and service marks in our business. We expect to rely on a variety of intellectual property protections for our products and technologies, including contractual obligations, and we intend to pursue a policy of vigorously enforcing such rights.

We have an ongoing policy of filing patent applications to seek protection for novel features of our products and technologies. Prior to the filing and granting of patents, our policy is to disclose key features to patent counsel and maintain these features as trade secrets prior to product introduction. Patent applications may not result in issued patents covering all important claims and could be denied in their entirety.

The use of force product industry is characterized by frequent litigation regarding patent and other intellectual property rights. Others, including academic institutions and competitors, hold numerous patents in less-lethal and related technologies. Although we are not aware of any existing patents that would materially inhibit our ability to commercialize our technology, others may assert claims in the future. Such claims, with or without merit, may have a material adverse effect on our financial condition, results of operations or cash flows.

The failure to obtain patent protection or the loss of patent protection on our existing and future technologies or the circumvention of our patents by competitors could have a material adverse effect on our ability to compete successfully.

Our policy is to enter into nondisclosure agreements with each employee and consultant or third party to whom any of our proprietary information is disclosed. These agreements prohibit the disclosure of confidential information to others, both during and subsequent to employment or the duration of the working relationship. These agreements may not prevent disclosure of confidential information or provide adequate remedies for any breach.

Research and Development

Our research and development initiatives are led by our internal personnel and make use of specialized consultants when necessary. These initiatives include basic research, mechanical engineering design and testing. Future development projects will focus on new versions of the BolaWrap™ technology and new security technologies. Total research and development expenditures were \$217,244 in 2016.

Employees and Executive Officers

We have three executive officers. We have one other employee engaged in marketing and distribution.

Properties

We lease approximately 1,890 square feet of office, assembly and warehousing space at 4620 Arville Street, Suite E, Las Vegas, Nevada 89103, pursuant to a three-year lease expiring December 2019 at a monthly rate of \$1,512. We expect that this property will be sufficient to meet our needs for at least the next 12 months.

Legal Proceedings

We are not aware of any pending or threatened legal proceedings in which we are involved. In addition, we are not aware of any pending or threatened legal proceedings in which entities affiliated with our officers, directors or beneficial owners are involved with respect to our operations.

DIRECTORS, EXECUTIVE OFFICERS AND PROMOTERS

Name	Age	Position(s)
Scot Cohen	48	Executive Chairman and Secretary
James A. Barnes	62	Director, President and Chief Financial Officer
Elwood G. Norris	78	Director and Chief Technology Officer

When and as business requires and funds are available, we may hire or appoint additional executive officers. We have no understanding or arrangements regarding any additional executive officers to be appointed on or after the consummation of the offering.

Scot Cohen cofounded the Company with Mr. Barnes and Mr. Norris in March 2016 and currently serves as its Executive Chairman and Secretary. He served as a Manager until the Company's incorporation in March 2017 when he was appointed to serve as the Company's Secretary. In July 2017, Mr. Cohen was appointed to serve as the Company's Executive Chairman. Mr. Cohen has over 20 year's experience in institutional asset management, wealth management, and capital markets. He currently serves as Executive Chairman of the Board of Petro River Oil Corp. (OTC Pink: PTRC) since 2012. Scot is the founder and serves as a principal of the Iroquois Capital Opportunity Fund, a closed end private equity fund focused on investments in North American oil and gas assets. He is also the co-founder of Iroquois Capital, a New York based hedge fund. In addition, he manages several operating and non-operating partnerships, which actively invest in the energy sector.

Prior to founding Iroquois Capital, Scot founded a merchant bank based out of New York, which was one of the most active participants in structured investments in public companies in the United States over the four-year period he was actively managing the business. Scot began his career at Oppenheimer and Company in a sales capacity and transitioned from there to a boutique investment-banking firm where he spent two years. Scot currently sits on the board of directors of True Drinks Holding, Inc. (OTC Pink:TRUU), as well as several private companies, and is involved a number of charitable ventures. Scot earned a Bachelor of Science degree from Ohio University in 1991.

The Board of Directors believes Mr. Cohen's success with multiple private investment firms, his extensive contacts within the investment community and financial expertise will assist the Company's efforts to raise capital to fund the continued implementation of the Company's business plan.

James A. Barnes cofounded the Company with Mr. Norris and Mr. Cohen in March 2016 and currently serves as a director, President and Chief Financial Officer. He served as Manager until the Company's incorporation in March 2017. He has been President of Sunrise Capital, Inc., a private venture capital and financial and regulatory consulting firm since 1984. He was Chief Financial Officer of Parametric Sound Corporation (now Turtle Beach Corporation) (Nasdaq GM: HEAR) from 2010 to February 2015, and from February 2015 to February 2017 served as Vice President Administration at Turtle Beach Corporation. Since 1999, he has been Manager of Syzygy Licensing LLC ("Syzygy"), a private technology invention and licensing company he owns with Mr. Norris. He previously practiced as a certified public accountant and management consultant with Ernst & Ernst (1976-1977), Touche Ross & Co. (1977-1980), and as a principal in J. McDonald & Co. Ltd., Phoenix, Arizona (1980-1984). He graduated from the University of Nebraska with a B.A. Degree in Business Administration in 1976 and is a certified public accountant (inactive).

Mr. Barnes possesses substantial financial, regulatory and management experience, and such experience is extremely valuable to the Board of Directors and the Company as it executes its business plan.

Elwood G. Norris cofounded the Company with Mr. Barnes and Mr. Cohen in March 2016 and currently serves as a director and Chief Technology Officer. He was a director and President of Parametric Sound Corporation (now Turtle Beach Corporation) (Nasdaq GM: HEAR) from 2010 to February 2015 and from February 2015 to September 2016 served as Chief Scientist, a non-executive position, at Turtle Beach. He was a director of LRAD Corporation (Nasdaq CM: LRAD) from August 1980 to June 2010. He served as Chairman of LRAD Corporation's Board of Directors, an executive position, in which he served in a technical advisory role and acted as a product spokesman from September 2000 to April 2009. He is an inventor, and has authored more than 80 U.S. patents, primarily in the fields of electrical and acoustical engineering, and has been a frequent speaker on innovation to corporations and government organizations. He is the inventor of our BolaWrap™ technology. Mr. Norris is a majority owner of Syzygy, but has no employment or management relationship with Syzygy.

Mr. Norris brings to the Company and the Board of Directors demonstrated product innovation ability and years of public company executive experience. As a result, the Board of Directors values the input provided by Mr. Norris, and believe his contributions to the deliberations of the Board and management are very valuable.

Director Independence

For a director to be considered “independent,” the Board must affirmatively determine that the director has no material relationship with the Company (directly or as a partner, stockholder or officer of an organization that has a relationship with the Company). In each case, the Board considers all relevant facts and circumstances. We currently have no independent directors.

Committees of the Board of Directors

During 2017, we plan to add at least two additional Board members and then we expect our Board of Directors will establish an Audit Committee and a Compensation Committee to assist it with its responsibilities. We expect all members of the Audit and Compensation Committees will meet the criteria for independence.

DIRECTOR COMPENSATION

We have not yet established arrangements to compensate our directors for their services.

EXECUTIVE COMPENSATION

Compensation of our Named Executive Officers; Summary Compensation Table

We have identified James A. Barnes as our only named executive officer as of December 31, 2016. Our named executive officers for 2017 will change, as Scot Cohen was appointed to serve as our Executive Chairman in July 2017, and we may hire or appoint other new executive officers.

The following table sets forth compensation accrued for Mr. Barnes during the year ended December 31, 2016.

<u>Name and Principal Position</u>	<u>Year</u>	<u>Salary</u>	<u>Stock Awards</u>	<u>Option Awards</u>	<u>All Other Compensation</u>	<u>Total</u>
James A. Barnes <i>President, Chief Financial Officer and Director</i>	2016	\$ 20,000	\$ -0-	\$ -0-	\$ -0-	\$ 20,000

Effective March 2016 through February 2017, the Company accrued monthly deferred compensation for the services of Messrs. Norris and Barnes in the aggregate amount of \$7,000 per month payable to Syzygy with Mr. Barnes’ proportionate share being \$2,000 per month. The balance as of December 31, 2016 was \$70,000 (\$20,000 allocable to Mr. Barnes), and at February 28, 2017 was \$84,000 (\$24,000 allocable to Mr. Barnes), which amount accrues without interest. There is currently no established repayment schedule or timing for payment, and the Company does not anticipate paying the accrued amounts owed to Mr. Barnes or Mr. Norris from the proceeds of the offering. Commencing March 1, 2017, Messrs. Norris and Barnes are each being paid compensation of \$6,000 per month for their services as employees and officers of the Company.

As noted above, Mr. Cohen was appointed to serve as the Company’s Executive Chairman in July 2017, in addition to his role as the Company’s Secretary. There is no compensation arrangement between Mr. Cohen and the Company for his services as the Company’s Executive Chairman or Secretary.

Syzygy, an entity controlled by Messrs. Norris and Barnes, will receive a royalty as described above in “*Business—Related Party License and Royalties*” in consideration for the license of certain technology necessary for the development of BolaWrap™ 100. We expect that Messrs. Norris and Barnes will continue to be compensated in their roles as officers as determined by our Board of Directors.

Description of the 2017 Equity Compensation Plan

The 2017 Equity Compensation Plan (the “2017 Plan”) was adopted by the Company’s Board of Directors on March 31, 2017, and approved by a majority of the Company’s shareholders on March 31, 2017. The 2017 Plan reserves for issuance 2.0 million shares of the Company’s Common Stock for issuance as one of four types of equity incentive awards: (i) stock options, (ii) restricted stock, and (iii) stock units. The 2017 Plan permits the qualification of awards under the plan as “performance-based compensation” within the meaning of Section 162(m) of the Internal Revenue Code.

Potential Payments Upon Termination, Death, Disability, or Retirement

We have no executive employee contracts at this time. Every officer and employee is an at will employee. The royalties payable to Syzygy, controlled by Messrs. Norris and Barnes, are unrelated to employment or their roles as officers, and will continue upon any termination, death, disability or retirement.

SECURITY OWNERSHIP BY CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The following table sets forth information concerning shares of our Common Stock beneficially owned as of July 27, 2017, by:

- each person or entity known by us to be the beneficial owner of 5% or more of the outstanding shares of Common Stock;
- each person is currently serving as director; and
- each of our named executive officers.

The share amounts in the table below are based on 20,475,000 shares of Common Stock issued and outstanding as of July 27, 2017. To our knowledge, except as otherwise indicated in the footnotes below, each person or entity has sole voting and investment power with respect to the shares of Common Stock set forth opposite such person's or entity's name. Beneficial ownership is determined in accordance with the rules of the SEC and generally includes voting or investment power with respect to the securities.

Title of Class	Name and Address of Beneficial Owner	Amount and Nature of Beneficial Ownership	Percent of Class
Common Stock	Elwood G. Norris 4620 Arville Street, Suite E Las Vegas, Nevada 89103	6,221,956 ⁽¹⁾	30.4%
Common Stock	Scot Cohen 4620 Arville Street, Suite E Las Vegas, Nevada 89103	5,605,744 ⁽²⁾	27.4%
Common Stock	James A. Barnes 4620 Arville Street, Suite E Las Vegas, Nevada 89103	2,632,366 ⁽³⁾	12.9%
Common Stock	David Norris 31101 via Peralta Coto de Caza, CA 92679	1,794,795 ⁽⁴⁾	8.8%
Common Stock	Twenty-Two Franklin Street Group, LLC 11 Arthur Ct. Jackson, NJ 08527	1,196,530	5.8%
	All directors and executive officers as a group (3 persons)	14,460,066	70.6%

(1) Consists of shares of Common Stock beneficially owned by Mr. Norris and his family trust.

(2) Includes 5,204,906 shares beneficially owned by Mr. Cohen and 400,838 shares beneficially owned by Petro River Oil Corp. (*Petro River*). Mr. Cohen is Executive Chairman of Petro River and the beneficial owner of 11% of the issued and outstanding common stock of Petro River. Mr. Cohen disclaims beneficial ownership of the Shares owned by Petro River.

(3) Includes 2,273,407 shares held by a family trust and 358,959 shares held by Sunrise Capital, Inc. Mr. Barnes is President of Sunrise Capital, Inc.

(4) Consists of shares of Common Stock held in family trust.

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

Effective March 2016, we began accruing monthly compensation for the services of Messrs. Norris and Barnes in the aggregate amount of \$7,000 per month payable to Syzygy. The balance as of December 31, 2016 was \$70,000 and accrues without interest. This arrangement ended in February 2017 with a balance of \$84,000 accrued.

We are obligated to pay royalties pursuant to an exclusive Amended and Restated Intellectual Property License Agreement, dated as of September 30, 2016, with Syzygy, a company owned and controlled by Messrs. Norris and Barnes, both officers and shareholders of the Company. The agreement provides for the payment of royalties of 4% of revenues from products employing the licensed device technology up to the earlier to occur of (i) the payment by the Company of an aggregate of \$1.0 million in royalties, or (ii) September 30, 2026. All patent applications and the technology related to the BolaWrap™ 100 have been assigned to the Company, subject to the royalty obligation. During the period ended December 31, 2016 we paid \$25,409 of patent legal costs incurred by Syzygy for the device technology pursuant to the license agreement.

DESCRIPTION OF OUR SECURITIES

We are authorized to issue 150,000,000 shares of our Common Stock, \$0.0001 par value per share, and 5,000,000 shares of preferred stock, \$0.0001 par value per share. The following description of our capital stock is subject to and qualified in its entirety by our Certificate of Incorporation and Bylaws, which are included as exhibits to the registration statement of which this prospectus is a part, and by the provisions of applicable Delaware law.

Issued and Outstanding Capital Stock

We have 20,475,000 shares of Common Stock issued and outstanding. We have no shares of preferred stock issued and outstanding.

Common Stock

There are 20,475,000 shares of our Common Stock issued and outstanding and held of record by 15 shareholders. The holders of our Common Stock are entitled to one vote per share on all matters to be voted upon by our shareholders. Subject to preferences that may be applicable to any future outstanding preferred stock, the holders of our Common Stock are entitled to receive ratably such dividends, if any, as may be declared from time to time by our Board of Directors out of funds legally available for that purpose. See “*Dividend Policy*” on page 17. In the event of our liquidation, dissolution or winding-up, the holders of our Common Stock are entitled to share ratably in all assets remaining after payment of liabilities, subject to prior distribution rights of preferred stock, if any, then outstanding. The holders of our Common Stock have no preemptive or conversion rights or other subscription rights. There are no redemption or sinking fund provisions applicable to our Common Stock.

Preferred Stock

Our Board of Directors has the authority, without action by our shareholders, to designate and issue preferred stock in one or more series and to designate the rights, preferences and privileges of each series, which may be greater than the rights of our Common Stock. It is not possible to state the actual effect of the issuance of any shares of our preferred stock upon the rights of holders of our Common Stock until our Board of Directors determines the specific rights of the holders of our preferred stock. However, the effects might include, among other things:

- restricting dividends on our Common Stock;
- diluting the voting power of our Common Stock;
- impairing the liquidation rights of our Common Stock;
- or
- delaying or preventing a change in control of our company without further action by our shareholders.

We have no present plans to issue any shares of our preferred stock.

Authorized but Unissued Capital Stock

Delaware law does not require stockholder approval for any issuance of authorized shares. These additional shares may be used for a variety of corporate purposes, including future public offerings, to raise additional capital or to facilitate acquisitions. One of the effects of the existence of unissued and unreserved Common Stock or preferred stock may be to enable our Board of Directors to issue shares to persons friendly to current management, which issuance could render more difficult or discourage an attempt to obtain control of our company by means of a merger, tender offer, proxy contest or otherwise, and thereby protect the continuity of our management and possibly deprive the shareholders of opportunities to sell their shares of Common Stock at prices higher than prevailing market prices.

Certificate of Incorporation; Bylaws

Our certificate of incorporation and bylaws contain provisions that could make more difficult the acquisition of the Company by means of a tender offer, a proxy contest or otherwise. These provisions are summarized below.

Undesignated Preferred Stock. The authorization of our undesignated preferred stock makes it possible for our Board of Directors to issue our preferred stock with voting or other rights or preferences that could impede the success of any attempt to change control of us. These and other provisions may have the effect of deferring hostile takeovers or delaying changes of control of our management.

Size of Board and Vacancies. Newly created directorships resulting from any increase in our authorized number of directors or any vacancies on the Board of Directors resulting from death, resignation, disqualification, removal or other causes and any newly created directorships resulting from any increase in the number of directors, shall unless the Board of Directors determines by resolution that any such vacancies or newly created directorships shall be filled by stockholder vote, be filled only by the affirmative vote of a majority of the directors then in office, even though less than a quorum of the Board of Directors.

No Cumulative Voting. Our certificate of incorporation and bylaws do not provide for cumulative voting in the election of directors.

Stockholder Meetings. Our bylaws provide that special meetings of the shareholders may be called only by our our President or by our Board of Directors or by the President at the request of holders of not less than 51% of all outstanding shares of our voting stock.

Delaware Laws

We are subject to Section 203 of the DGCL (“*Section 203*”). In general, Section 203 prohibits a publicly held Delaware corporation from engaging in “business combination” transactions with any “interested stockholder” for a period of three years following the time that the stockholder became an interested stockholder, unless:

- prior to the time the stockholder became an interested stockholder, either the applicable business combination or the transaction which resulted in the stockholder becoming an interested stockholder is approved by the corporation’s board of directors;
- upon consummation of the transaction which resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced, excluding for purposes of determining the voting stock outstanding (but not the voting stock owned by the interested stockholder) shares owned by directors who are also officers of the corporation and shares owned by employee stock plans in which the employee participants do not have the right to determine confidentially whether shares held subject to the plan will be tendered in a tender or exchange offer; or
- at or subsequent to the time that the stockholder became an interested stockholder, the business combination is approved by the corporation’s board of directors and authorized at an annual or special meeting of stockholders by the affirmative vote of at least 6 6 2 /3% of the outstanding voting stock which is not owned by the interested stockholder.

A “business combination” is defined to include, in general and subject to exceptions, a merger of the corporation with the interested stockholder; a sale of 10% or more of the market value of the corporation’s consolidated assets to the interested stockholder; certain transactions that result in the issuance of the corporation’s stock to the interested stockholder; a transaction that has the effect of increasing the proportionate share of the corporation’s stock owned by the interested stockholder; and any receipt by the interested stockholder of loans, guarantees or other financial benefits provided by the corporation. An “interested stockholder” is defined to include, in general and subject to exceptions, a person that (1) owns 15% or more of the outstanding voting stock of the corporation or (2) is an “affiliate” or “associate” (as defined in Section 203) of the corporation and was the owner of 15% or more of the corporation’s outstanding voting stock at any time within the prior three year period.

A Delaware corporation may opt out of Section 203 with an express provision in its original certificate of incorporation or by an amendment to its certificate of incorporation or bylaws expressly electing not to be governed by Section 203 and approved by a majority of its outstanding voting shares. We have not opted out of Section 203. As a result, Section 203 could delay, deter or prevent a merger, change of control or other takeover of our company that our stockholders might consider to be in their best interests, including transactions that might result in a premium being paid over the market price of our common stock, and may also limit the price that investors are willing to pay in the future for our common stock.

SHARES ELIGIBLE FOR FUTURE SALE

Assuming we sell 2,666,666 shares in this offering, there will be approximately 23,141,666 shares of Common Stock issued and outstanding, based upon the number of shares of Common Stock outstanding on July 27, 2017. No preferred shares are outstanding. Of these outstanding shares, all shares of Common Stock sold by us in this offering will be freely tradable in the public market without restriction or further registration under the Securities Act of 1933, as amended (the “*Securities Act*”), and shares of Common Stock held by our affiliates, as that term is defined in Rule 144 under the Securities Act, may only be sold in compliance with the limitations described below. Further, as described below, we plan to file a registration statement to cover the shares issued under our equity incentive plans. All remaining shares of Common Stock, including shares issued to Petro River Oil Corp. in connection with the Merger with MegaWest, will remain deemed restricted under the Federal securities laws.

Rule 144

In general, under Rule 144 as currently in effect, a person (or persons whose shares are aggregated), including an affiliate, who beneficially owns “restricted securities” of a “reporting company” may not sell these securities until the person has beneficially owned them for at least six months. Thereafter, affiliates may not sell within any three-month period a number of shares in excess of the greater of: (i) one percent of the shares of Common Stock issued and outstanding, or (ii) the average weekly trading volume during the four calendar weeks preceding the filing of a Form 144, or if no such notice is required, the date of receipt of the order to execute the transaction.

Sales under Rule 144 by our affiliates also will be subject to restrictions relating to manner of sale, notice and the availability of current public information about us and may be effected only through unsolicited brokers’ transactions.

Persons not deemed to be our affiliates who have beneficially owned “restricted securities” for at least six months but for less than one year may sell these securities, provided that current public information about us is “available,” which means that, on the date of sale, we have been subject to the reporting requirements of the Securities Exchange Act of 1934, as amended (“*Exchange Act*”) for at least ninety days and are current in our Exchange Act filings. After beneficially owning “restricted securities” for one year, our non-affiliates may engage in unlimited resales of such securities.

Shares received by our affiliates, including those received upon exercise of stock options or upon vesting of other equity-linked awards may be “controlled securities” rather than “restricted securities.” “Controlled securities” are subject to the same volume limitations as “restricted securities” but are not subject to holding period requirements.

Stock Plans

The Company has adopted the 2017 Equity Compensation Plan (“*2017 Plan*”). The 2017 Plan provides for the issuance of up to 2,000,000 shares of Common Stock pursuant to awards granted under the terms of the 2017 Plan. As of April 14, 2017, no awards providing for the issuance of shares of Common Stock have been issued. No prediction can be made as to the effect, if any, that market sales of restricted or freely trading shares of Common Stock issued under the terms of the 2017 Plan will have on the market price of our Common Stock prevailing from time to time. Nevertheless, sales of substantial amounts of Common Stock, or the perception that such sales could occur, could adversely affect prevailing market prices for our Common Stock and could impair our future ability to raise capital through an offering of our equity securities.

PLAN OF DISTRIBUTION

This prospectus relates to the sale of 2,666,666 Shares of Common Stock.

There is currently no market for our securities. Our Common Stock is not traded on any exchange or on the over-the-counter market. While a market maker has filed a Rule 211 application with the Financial Industry Regulatory Authority ("FINRA") so that our Common Stock may be quoted on an interdealer quotation system such as the OTC Markets, such efforts may not be successful and our Shares may never be quoted and owners of our Common Stock may not have a market in which to sell the Shares. Also, no estimate may be given as to the time that this application process will require.

We intend to sell the Shares ourselves and do not intend to use underwriters or pay any commissions for these sales. We will be selling the Shares using the best efforts of our officers and directors. No officer or director will receive any compensation for sales made.

In accordance with Rule 3(a)(4)(ii) of the Securities Exchange Act, our officers and directors primarily perform substantial duties on behalf of the issuer that have no connection to securities transactions.

None of our officers or directors are a broker or dealer or an associated person of a broker or dealer, nor have they been within the preceding 12 months. They will not participate in selling an offering of securities for any issuer more than once every twelve months other than in reliance on Rule 3(a)(4)(i) and (iii).

There is no plan or arrangement to enter into any contracts or agreements to sell the Shares with a broker or dealer. Our officers and directors will sell the Shares and intend to offer them to friends, family members and business acquaintances. The intended methods of communication include, without limitation, telephone calls, communication via e-mail and personal contact. In their endeavors to sell the Shares, our officers and directors will not use any mass advertising methods such as the internet or print media.

There is no minimum number of Shares we must sell so no money raised from the sale of the Shares will go into escrow, trust or another similar arrangement.

Under the rules of the Securities and Exchange Commission, our Common Stock will come within the definition of a "penny stock" because the price of our Common Stock on the OTC Bulletin Board is below \$5.00 per share. As a result, our Common Stock will be subject to the "penny stock" rules and regulations. Broker-dealers who sell penny stocks to certain types of investors are required to comply with the Commission's regulations concerning the transfer of penny stock. These regulations require broker-dealers to:

- Make a suitability determination prior to selling penny stock to the purchaser;
- Receive the purchaser's written consent to the transaction; and
- Provide certain written disclosures to the purchaser.

DETERMINATION OF OFFERING PRICE

Our Common Stock is presently not traded on any market or securities exchange, although a market maker has filed a Rule 211 application with FINRA so that our Common Stock may be quoted on an interdealer quotation system such as the OTC Markets. We are offering the Shares at a price of \$1.50 per Share, which is set forth on the cover page of this prospectus. Such offering price does not have any relationship to any established criteria of value, such as book value or earnings per share of Common Stock. The price of our Common Stock is not based on past earnings, nor is the price of our Common Stock indicative of the current market value of the assets owned by us. No valuation or appraisal has been prepared for our business and potential business expansion.

LEGAL MATTERS

Disclosure Law Group, a Professional Corporation, has issued an opinion that the Shares of Common Stock being issued pursuant to this offering are duly authorized and validly issued, fully paid and non-assessable.

EXPERTS

The financial statements included in this Prospectus and in the registration statement have been audited by Rosenberg Rich Baker Berman & Company, independent registered public accounting firm, to the extent and for the periods set forth in their report, appearing in the financial statements beginning on Page F-1 in this prospectus, and are included in reliance upon such report given upon the authority of said firm as experts in auditing and accounting.

WHERE YOU CAN FIND MORE INFORMATION

We have filed a registration statement on Form S-1 with the Securities and Exchange Commission ("SEC"). This prospectus, which forms a part of that registration statement, does not contain all of the information included in the registration statement and the exhibits and schedules thereto as permitted by the rules and regulations of the SEC. For further information with respect to us and the Shares of our Common Stock offered hereby, please refer to the registration statement, including its exhibits and schedules. Statements contained in this prospectus as to the contents of any contract or other document referred to herein are not necessarily complete and, where the contract or other document is an exhibit to the registration statement, each such statement is qualified in all respects by the provisions of such exhibit, to which reference is hereby made. You may review a copy of the registration statement at the SEC's public reference room at 100 F Street, N.E., Washington, DC 20549. Please call the SEC at 1-800-SEC-0330 for further information on the operation of the public reference rooms. The registration statement can also be reviewed by accessing the SEC's website at <http://www.sec.gov>. We are subject to the information and reporting requirements of the Exchange Act and, in accordance therewith, file periodic reports, proxy statements or information statements, and other information with the SEC. These reports can also be reviewed by accessing the SEC's website.

You should rely only on the information provided in this prospectus, any prospectus supplement or as part of the registration statement filed on Form S-1 of which this prospectus is a part, as such registration statement is amended and in effect with the Securities and Exchange Commission. We have not authorized anyone else to provide you with different information. We are not making an offer of these securities in any state where the offer is not permitted. You should not assume that the information in this prospectus, any prospectus supplement or any document incorporated by reference is accurate as of any date other than the date of those documents.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Members of Wrap Technologies, LLC

We have audited the accompanying balance sheet of Wrap Technologies, LLC as of December 31, 2016 and the related statements of operations, members' equity, and cash flows for period from Inception (March 2, 2016) to December 31, 2016. Wrap Technologies, LLC's management is responsible for these financial statements. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Wrap Technologies, LLC as of December 31, 2016, and the results of its operations and its cash flows for the period from Inception (March 2, 2016) to December 31, 2016, in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has generated significant losses since inception and anticipates that it will continue to generate significant losses and require substantial additional investment. These conditions raise substantial doubt about its ability to continue as a going concern. Management's plans regarding those matters also are described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty. Our opinion is not modified with respect to that matter.

Wrap Technologies, LLC
Notes to Financial Statements

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization and Business Description

Wrap Technologies, LLC (“Wrap” or the “Company”) is a developer of security products designed for use by law enforcement and security personnel. The Company plans to introduce its first product, the BolaWrap™ 100 remote restraint device, during 2017.

The Company was organized as a Delaware limited liability company on March 2, 2016 and is headquartered in Las Vegas, Nevada.

Basis of Presentation and Use of Estimates

The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”). The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions (e.g., recognition and measurement of contingencies and accrued costs) that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements and affect the reported amounts of revenues and expenses during the reporting period. Actual results could materially differ from those estimates.

Going Concern

Since inception in March 2016, the Company has generated significant losses from operations and anticipates that it will continue to generate significant losses from operations for the foreseeable future, and that in order to continue as a going concern, the business will require substantial additional investment that has not yet been secured. The Company’s loss from operations was \$234,356 for the period ended December 31, 2016. The net cash used from operations and investing was \$187,428 for the period ended December 31, 2016. On December 31, 2016 the Company had \$255,072 in cash and in January 2017 received additional \$225,000 cash from the sale of membership units. As of December 31, 2016, the Company’s obligations included \$84,965 of current liabilities and lease commitments of approximately \$51,000.

Management has concluded that due to the conditions described above, there is substantial doubt about the entity’s ability to continue as a going concern through March 29, 2018.

Management has evaluated the significance of the conditions in relation to the Company’s ability to meet its obligations and believes that the current cash balance will provide sufficient capital to continue operations through approximately June 2017. While the Company plans to raise capital to address its capital deficiencies and meet its operating cash requirements, there is no assurance that its plans will be successful. Management cannot assure you that financing will be available on favorable terms or at all. Additionally, if additional capital is raised through the sale of equity or convertible debt securities, the issuance of such securities would result in dilution to the Company’s existing members. Furthermore, despite management’s optimism regarding the Company’s technology and planned products, even in the event that the Company is adequately funded, there is no guarantee that any products or product candidates will perform as hoped or that such products can be successfully commercialized.

Net Loss per Membership Unit

Basic net loss per unit is computed by dividing net loss by the weighted average number of membership units outstanding during the period. Diluted net loss per unit is computed by dividing net loss by the weighted average number of membership units and membership unit equivalents outstanding during the period. There were no membership unit equivalents outstanding during the period presented; accordingly, the Company’s basic and diluted net loss per unit are the same.

Wrap Technologies, LLC
Notes to Financial Statements

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
(continued)

Fair Value of Financial Instruments

The carrying amounts of cash, accounts payable and accrued liabilities approximate fair values due to the short maturity of these instruments.

Concentrations of Credit Risk

Financial instruments, which potentially subject the Company to concentrations of credit risk, consist primarily of cash. Due to the relative short nature of such instrument, the carrying amount approximates fair value. The Company places its cash in a demand deposit account at one bank and such balances may at times be in excess of amounts insured by federal agencies, which is \$250,000 as of December 31, 2016. The Company does not believe that it is subject to any unusual financial risk beyond the normal risk associated with commercial banking relationships. The Company performs periodic evaluations of the relative credit standing of these financial institutions. The Company has not experienced any significant losses on its cash equivalents.

Property, Equipment and Depreciation

Property and equipment is stated at cost. Depreciation on property and equipment is computed over the estimated useful lives of three years using the straight-line method. The Company intends, on any retirement or disposition of property and equipment, that the related cost and accumulated depreciation or amortization will be removed and a gain or loss recorded.

Impairment of Long-Lived Assets

Long-lived assets and identifiable intangibles held for use are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If the sum of undiscounted expected future cash flows is less than the carrying amount of the asset or if changes in facts and circumstances indicate, an impairment loss is recognized and measured using the asset's fair value. The Company did not recognize any impairment loss during the period ended December 31, 2016.

Startup Costs

The Company expensed startup costs related to the development of its business including approximately \$24,600 incurred prior to legal formation. Patent legal costs incurred are expensed as research and development costs until evidence of patentability is confirmed.

Research and Development Costs

Research and development costs consist primarily of contract development costs and experimental work materials and certain startup patent costs. Research and development costs with no alternative use are expensed as incurred.

Income Taxes

The Company is treated as a partnership for federal and state income tax purposes and generally does not incur income taxes. Instead, its income or losses are included in the income tax returns of the member partners. Accordingly, no provision or liability for federal or state income taxes has been included in these financial statements.

The Company recognizes and measures tax benefits when realization of the benefits is uncertain under a two-step approach. The first step is to determine whether the benefit meets the more-likely-than-not condition for recognition and the second step is to determine the amount to be recognized based on the cumulative probability that exceeds 50%. The Company has not recognized any liability for unrecognized tax benefits and has not identified any uncertain tax positions.

Wrap Technologies, LLC
Notes to Financial Statements

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
(continued)

The Company files income tax returns in the U.S. federal jurisdictions and being domiciled in Nevada currently files no state income tax returns.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2014-09, *Revenue from Contracts with Customers*. This new standard will replace most of the existing revenue recognition guidance in U.S. GAAP when it becomes effective and permits the use of either the retrospective or cumulative effect transition method. The new standard, as amended, becomes effective for the Company in the first quarter of 2018, but allows the Company to adopt the standard one year earlier if it so chooses. Should the Company enter into any applicable customer contracts in 2017 it plans to apply the provisions of this standard.

In August 2014, FASB issued Accounting Standards Update (ASU) No. 2014-15, *Preparation of Financial Statements – Going Concern (Subtopic 205-40), Disclosure of Uncertainties about an Entity’s Ability to Continue as a Going Concern*. The new standard provides guidance around management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. The Company adopted this standard during the year ended December 31, 2016.

In February 2016, the FASB issued ASU 2016-02, “*Leases (Topic 842)*.” The new guidance will replace the current lease guidance. The new guidance requires that entities recognize the assets and liabilities associated with leases on the balance sheet and to disclose key information about leasing arrangements. The new guidance is effective in fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Therefore, the Company is required to adopt the guidance on January 1, 2019. Early adoption is permitted. The Company is currently evaluating the possible impact of ASU 2016-02, but does not anticipate that it will have a material impact on the Company's results of operations, financial position or cash flows.

In August 2016, the FASB issued ASU 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipt and Cash Payments*. The new guidance addresses certain classification issues related to the statement of cash flows which will eliminate the diversity of practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The guidance is effective for fiscal years beginning after December 2017. Early adoption is permitted. The Company is currently evaluating the possible impact of ASU 2016-15, but does not anticipate that it will have a material impact on the Company's results of operations, financial position or cash flows.

The Company has reviewed other recently issued, but not yet effective, accounting pronouncements and does not believe the future adoptions of any such pronouncements will be expected to cause a material impact on its financial condition or the results of operations.

Wrap Technologies, LLC
Notes to Financial Statements

**2. PROPERTY AND EQUIPMENT,
NET**

Property and equipment consist of the following at December 31, 2016:

Equipment	\$ 7,342
Furniture	2,196
	<u>9,538</u>
Accumulated depreciation	(1,312)
	<u>\$ 8,226</u>

Depreciation expense was \$1,312 for the period ended December 31, 2016.

3. DEFERRED COMPENSATION

Effective March 2016 the Company began accruing monthly compensation for the services of two officers in the aggregate amount of \$7,000 per month payable to Syzygy Licensing, LLC (“Syzygy”). The balance as of December 31, 2016 was \$70,000 and accrues without interest. No repayment terms or schedule has been established.

4. MEMBERS’ EQUITY

The Company has one class of membership units which include certain transfer restrictions as specified in the operating agreement and pursuant to applicable tax and securities law, with each unit representing a pro rata ownership in the Company’s capital, profits, losses and distributions. Losses are allocated to members in accordance with their capital balances until zero and thereafter based upon their respective percentage of units held. Income is allocated first to the extent of previous losses and thereafter allocated to members based upon their respective percentage of units held.

During 2016 the Company obtained cash capital contributions of \$442,500 from the issuance of 729 membership units.

**5. COMMITMENTS AND
CONTINGENCIES**

Facility Lease

Commencing December 1, 2016 the Company leased 1,890 square feet of improved office, assembly and warehouse space in Las Vegas, Nevada for a period of 37 months terminating December 31, 2019. The gross monthly base rent is \$1,512 increasing approximately 3.5% per year, subject to certain future adjustments. The Company may receive an aggregate of three months of base rent concessions over the term of the lease subject to timely rent payments.

Rent expense for the period ended December 31, 2016 was \$1,510. The remaining future annual minimum lease obligations under the foregoing facility lease are \$15,158, \$17,123 and \$19,051 for 2017, 2018 and 2019, respectively.

Related Party Technology License Agreement

The Company is obligated to pay royalties and pay development and patent costs pursuant to an exclusive Amended and Restated Intellectual Property License Agreement dated as of September 30, 2016 with Syzygy, a company owned and controlled by member/officers Mr. Norris and Mr. Barnes (also a Manager of the Company). The agreement provides for royalties of 4% of revenues from products employing the licensed ensnarement device technology up to an aggregate of \$1,000,000 of royalties or until September 30, 2026, whichever is earlier. The license reverted to Syzygy unless the Company obtained aggregated capitalization of at least \$300,000 by December 31, 2016 (subject to a 6-month extension). As the requirement was met, Syzygy has assigned patent applications and the technology to the Company subject to the royalty obligation.

Wrap Technologies, LLC
Notes to Financial Statements

5. COMMITMENTS AND CONTINGENCIES (continued)

Indemnifications and Guarantees

Our officers and managers are indemnified as to personal liability as provided by the Delaware law and the Company's operating agreement. The Company may also undertake indemnification obligations in the ordinary course of business related to its operations. The Company is unable to estimate with any reasonable accuracy the liability that may be incurred pursuant to any such indemnification obligations now or in the future. Because of the uncertainty surrounding these circumstances, the Company's current or future indemnification obligations could range from immaterial to having a material adverse impact on its financial position and its ability to continue in the ordinary course of business. The Company has no liabilities recorded for such indemnities.

Regulatory Agencies

The Company may be subject to oversight from regulatory agencies regarding firearms that arise in the ordinary course of its business.

6. RELATED PARTY TRANSACTIONS

During the period ended December 31, 2016 the Company paid \$25,409 of patent legal costs incurred by Syzygy for the ensnarement device technology pursuant to the license agreement (see Note 6) with such technology subsequently assigned to the Company. See Notes 3, 5 and 7 for additional related party transactions and information.

7. SUBSEQUENT EVENTS

In January 2017 the Company obtained additional cash capital contributions of \$225,000 from the issuance of 90 membership units.

On March 22, 2017 the Company issued 16.75 membership units to Petro River Oil Corp. ("*Petro*") to acquire 100% ownership of its non-operating subsidiary Megawest Energy Montana Corp. ("*Megawest*"). Megawest had no assets or liabilities as of the acquisition date. Scot Cohen, who is a member and manager of the Company, beneficially owns 14% of Petro. The Company intends to merge into Megawest and as part of the purchase of Megawest agreed to file a registration statement with respect to its Shares within 60 days.

8. UNAUDITED PRO FORMA FINANCIAL INFORMATION

On March 31, 2017 Wrap Technologies, LLC merged with and into its wholly-owned subsidiary MegaWest (see Note 7). Wrap Technologies, LLC ceased separate existence with Megawest continuing as the surviving entity. MegaWest changed its name to Wrap Technologies, Inc. and amended and restated new articles of incorporation authorizing 150,000,000 shares of Common Stock, par value \$0.0001, and 5,000,000 shares of preferred stock, par value \$0.0001. All outstanding 835.75 membership units of Wrap LLC were exchanged for 20,000,000 shares of Common Stock of the Company.

The Company's subsequent merger with and into the MegaWest wholly-owned subsidiary and exchange of membership units for Common Stock will be accounted for as a reverse recapitalization of the Company. Wrap Technologies, Inc. financial statements are in substance those of Wrap Technologies, LLC and deemed to be a continuation of the Company's business from its inception date of March 2, 2016. The balance sheet of the Company continues at historical cost as the accounting acquiree ("*Megawest*") had no operating business, no assets or liabilities and no goodwill or intangible assets was recorded as part of the recapitalization of the Company.

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization and Business Description

Wrap Technologies, Inc. (the “*Company*”) is a developer of security products designed for use by law enforcement and security personnel. The Company plans to introduce its first product, the BolaWrap™ 100 remote restraint device, during 2017.

The Company resulted from the March 31, 2017 merger of Wrap Technologies, LLC (“*Wrap LLC*”) with and into its wholly-owned subsidiary MegaWest Energy Montana Corp. (“*MegaWest*”). Wrap LLC ceased separate existence with MegaWest continuing as the surviving entity. MegaWest changed its name to Wrap Technologies, Inc. and amended and restated new articles of incorporation authorizing 150,000,000 shares of Common Stock, par value \$0.0001, and 5,000,000 shares of preferred stock, par value \$0.0001. All outstanding 835.75 membership units of Wrap LLC were exchanged for 20,000,000 shares of Common Stock of the Company.

Wrap LLC acquired privately held MegaWest from Petro River Oil Corp. (“*Petro River*”) on March 22, 2017 through the issuance of 16.75 membership units representing a 2% ownership interest in Wrap LLC. Petro River is owned 11% by Scot Cohen its Executive Chairman who also was a Manager and 26% owner of Wrap LLC and a director and officer of the Company. MegaWest had no assets or liabilities at the date of acquisition nor at December 31, 2016 and is not considered an operating business.

Wrap LLC’s acquisition of MegaWest and its subsequent merger with and into the MegaWest wholly-owned subsidiary and exchange of membership units for Common Stock has been accounted for as a reverse recapitalization of Wrap LLC. Wrap LLC, now the Company, is deemed the accounting acquirer with MegaWest the accounting acquiree. The Company’s financial statements are in substance those of Wrap LLC and deemed to be a continuation of its business from its inception date of March 2, 2016. The balance sheet of the Company continues at historical cost as the accounting acquiree had no assets or liabilities and no goodwill or intangible assets was recorded as part of the recapitalization of the Company.

To reflect the recapitalization historical common shares and additional paid-in capital have been retroactively adjusted using the exchange ratio of approximately 23,930.60 shares for each membership unit of Wrap LLC.

Basis of Presentation and Use of Estimates

The Company’s unaudited interim financial statements included herein have been prepared in accordance with Article 8 of Regulation S-X and the rules and regulations of the Securities and Exchange Commission (“*SEC*”). Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. In management’s opinion, the accompanying statements reflect adjustments necessary to present fairly the financial position, results of operations, and cash flows for the periods indicated, and contain adequate disclosure to make the information presented not misleading. Adjustments included herein are of a normal, recurring nature unless otherwise disclosed in the footnotes. The interim financial statements and notes thereto should be read in conjunction with the Company’s audited financial statements and notes thereto for the year ended December 31, 2016. Results of operations for interim periods are not necessarily indicative of the results of operations for a full year.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions (e.g., recognition and measurement of contingencies and accrued costs) that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements and affect the reported amounts of revenues and expenses during the reporting period. Actual results could materially differ from those estimates.

Wrap Technologies, Inc.
Notes to Unaudited Condensed Interim Financial Statements

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
(continued)

Going Concern

Since inception in March 2016, the Company has generated significant losses from operations and anticipates that it will continue to generate significant losses from operations for the foreseeable future, and that in order to continue as a going concern, the business will require substantial additional investment that has not yet been secured. The Company's loss from operations was \$234,356 for the period ended December 31, 2016 and \$201,755 for the three months ended March 31, 2017. The net cash used from operations and investing was \$187,428 for the period ended December 31, 2016 and \$131,347 for the three months ended March 31, 2017. On March 31, 2017 the Company had \$344,629 in cash. As of March 31, 2017, the Company's obligations included \$155,050 of current liabilities and lease commitments of approximately \$48,300.

Management has concluded that due to the conditions described above, there is substantial doubt about the Company's ability to continue as a going concern through April 17, 2018.

Management has evaluated the significance of the conditions in relation to the Company's ability to meet its obligations and believes that the current cash balance will provide sufficient capital to continue operations through approximately June 2017. While the Company plans to raise capital to address its capital deficiencies and meet its operating cash requirements, there is no assurance that its plans will be successful. Management cannot assure you that financing will be available on favorable terms or at all. Additionally, if additional capital is raised through the sale of equity or convertible debt securities, the issuance of such securities would result in dilution to the Company's existing shareholders. Furthermore, despite management's optimism regarding the Company's technology and planned products, even in the event that the Company is adequately funded, there is no guarantee that any products or product candidates will perform as hoped or that such products can be successfully commercialized.

Net Loss per Share

Basic loss per common share is computed by dividing net loss for the period by the weighted-average number of shares of Common Stock outstanding during the period. Diluted loss per common share is computed by dividing net loss by the weighted-average number of shares of Common Stock outstanding during the period increased to include the number of additional shares of Common Stock that would have been outstanding if the potentially dilutive securities had been issued. There were no Common Stock equivalents outstanding during the periods presented; accordingly, the Company's basic and diluted net loss per share are the same.

Income Taxes

Until its reverse recapitalization on March 31, 2017, the Company was treated as a partnership for federal and state income tax purposes and did not incur income taxes. Instead, its losses were included in the income tax returns of the member partners. Accordingly, no provision or liability for federal or state income taxes has been included in these financial statements.

Recent Accounting Pronouncements

The Company has reviewed recently issued, but not yet effective, accounting pronouncements and does not believe the future adoptions of any such pronouncements will be expected to cause a material impact on its financial condition or the results of operations.

**2. PROPERTY AND EQUIPMENT,
NET**

Property and equipment consisted of the following:

	<u>March 31, 2017</u>	<u>December 31, 2016</u>
Laboratory equipment	\$ 11,222	\$ 7,342
Computer equipment	216	-
Furniture and fixtures	2,196	2,196
	<u>13,634</u>	<u>9,538</u>
Accumulated depreciation	<u>(2,107)</u>	<u>(1,312)</u>
	<u>\$ 11,527</u>	<u>\$ 8,226</u>

Depreciation expense was \$795 for the three months ended March 31, 2017.

3. DEFERRED AND ACCRUED COMPENSATION

Effective March 2016 the Company began accruing monthly compensation for the services of two officers in the aggregate amount of \$7,000 per month payable to Syzygy Licensing, LLC ("Syzygy"). Beginning in March 2017 the Company began accruing \$6,000 per month compensation to each of the two officers. The balance payable to Syzygy as of March 31, 2017 was \$84,000 and the accrued compensation aggregated \$12,000. These balances accrue without interest. No repayment terms or schedule has been established.

4. STOCKHOLDERS' EQUITY AND SHARE-BASED COMPENSATION

The Company's authorized capital consists of 150,000,000 shares of Common Stock, par value \$0.0001, and 5,000,000 shares of preferred stock, par value \$0.0001. To reflect the recapitalization (see Note 1) historical shares of Common Stock and additional paid-in capital have been retroactively adjusted using the exchange ratio of approximately 23,930.60 shares of Common Stock for each membership unit of Wrap LLC.

Effective with the merger, the Company adopted and the shareholders approved on March 31, 2017 the 2017 Equity Compensation Plan authorizing 2,000,000 shares of Common Stock for issuance as stock options and restricted stock units to employees, directors or consultants. At March 31, 2017, there had been no option grants or restricted stock awards made and none were outstanding.

**5. COMMITMENTS AND
CONTINGENCIES**

Facility Lease

Commencing December 1, 2016 the Company leased 1,890 square feet of improved office, assembly and warehouse space in Las Vegas, Nevada for a period of 37 months terminating December 31, 2019. The gross monthly base rent is \$1,512 increasing approximately 3.5% per year, subject to certain future adjustments. The Company may receive an aggregate of three months of base rent concessions over the term of the lease subject to timely rent payments.

Rent expense for the period ended March 31, 2017 was \$4,530. The remaining future annual minimum lease obligations under the foregoing facility lease are \$12,134, \$17,123 and \$19,051 for the balance of 2017, 2018 and 2019, respectively.
